

Arms Races

**Thomas Mahnken, Joseph Maiolo, David
Stevenson**

Arms Races:

The Arms Race Anita Croy, 2019-07-15 Arms races are often associated with the Cold War but they are still a reality around the world today. Issues such as military aggression and nuclear weapons are complex but they are presented to readers in an accessible way. A fact-filled main text, engaging full-color photographs, and helpful graphic organizers richly present details about the arms race. Readers are challenged to think for themselves about international arms races as they explore discussion questions and are asked to compare and contrast the viewpoints of experts. Although news stories about weapons and wars might seem frightening to young people, this volume stresses the importance of facts over fear-mongering. **Do Arms Races Exist?** Charles H. Fairbanks (Jr), 1985 *Arms Races in International Politics* Thomas Mahnken, Joseph Maiolo, David Stevenson, 2016-01-14 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics, drawing both on theoretical approaches and on the latest historical research. Written by an international team of specialists, it is divided into four sections: before 1914, the inter-war years, the Cold War, and extra-European and post-Cold War arms races. Twelve case studies examine land and naval armaments before the First World War, air, land, and naval competition during the 1920s and 1930s, and nuclear as well as conventional weapons since 1945. Armaments policies are placed within the context of technological development, international politics, and diplomacy, and social, political, and economic factors. An extended general introduction and conclusion, and introductions to each section, provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists. *Arms Races in International Politics* addresses two key questions: what causes arms races and what is the connection between arms races and the outbreak of wars. **War in Heaven** Helen Caldicott, Craig R. Eisendrath, 2007 When most of us think about the potential of outer space for future generations, we think of world communications, satellite navigation, and scientific exploration. U.S. Space Command, however, thinks about weapons. Believing that conflict in space and wars fought from space are inevitable, the president has called on the agency to weaponize outer space and thus provoke an arms race that could cost the United States trillions of dollars and could lead to the demise of the human race. In *War in Heaven*, a Nobel Prize-nominated peace activist and a former U.S. foreign service officer who helped write the Outer Space Treaty of 1967, look at the history of military uses of space and the current plans for militarizing the heavens, including kinetic laser, nuclear bombardment, and anti-satellite weapons. Contrary to the claims of Secretary of Defense Donald Rumsfeld that the United States faces a space Pearl Harbor, Caldicott and Eisendrath show that the United States itself is today the principal obstruction to passage of an international treaty banning weapons from outer space. At a time when plans to build and deploy space weapons are on the administration's agenda but only just becoming known to the general public, this book will help launch a national discussion of a critical issue. **Tacit Bargaining, Arms Races, and Arms Control** George W. Downs, David M. Rocke, 2025-10-01 When most people, including social scientists, reflect on the ways that nations resolve their

differences they tend to think in terms of polar alternatives war versus negotiation This perspective ignores a third path tacit bargaining which is applicable as this book shows to a wide variety of international issues and is especially germane to the problem of treaty maintenance

Arms Race Theory Craig Etcheson, 1989 For most of the twentieth century social scientists have attempted to understand the causes of military competition From this struggle has evolved the Richardson Tradition of Arms Race Analysis a distinct body of scientific literature that uses a variety of mathematical techniques and theoretical ideas to solve the puzzle of what drives military interaction among nations Etcheson explores this intellectual journey and projects the paths along which the Richardson Tradition must go if it is to obtain its objective understanding and control of potentially unnecessary organized social violence Arms Race Theory examines thoroughly the literature of the Richardson Tradition from the writings of Lewis Fry Richardson through the most recent attempts of his students to resolve the fundamental questions about interaction in arms races Etcheson documents the application of the procedures of positive physical science to social problems and identifies the reasons why Richardson and his students have been frustrated in their efforts According to the author students of the Richardson Tradition adhere to an atomistic and reductionist perspective that denies the relevance of human values and intentions He focuses on the idea of strategy as a gateway to an understanding of the social causes of arms accumulation Etcheson prepares the way for a new phase in the Richardson Tradition by identifying new theoretical foci and methodological techniques His analysis coupled with the most comprehensive bibliography of the literature of the Richardson Tradition currently available is a significant contribution to the growing body of scholarship in peace research and international relations theory

Arms Races, Arms Control, and Conflict Analysis Walter Isard, 1989-02-24 Demonstrating the ways in which work in a broad range of fields can be pulled together in the analysis of conflict this book provides the reader with a general introduction to the principles of conflict analysis and lays a methodological foundation for the further development of the interdisciplinary field of peace science The text begins with an extensive survey of arms race models from the classic Richardson model to models exploring the effects of factors such as the domestic and international economic environment public opinion and party politics and weapons technology and information development The processes of individual and group problem solving in both crisis and non crisis conditions are examined drawing on work in economics operations research cognitive science and artificial intelligence Building on this diverse body of work the author moves on to develop a framework for conflict management with which to approach a variety of conflict situations and applies this procedure to the United States Soviet arms control conflict Walter Isard is cited by Mark Blaug as one of the Great Economists Since Keynes CUP 1989 paper edition

The Soviet-American Arms Race Colin S. Gray, 1976

Return to Armageddon Ronald E. Powaski, 2000 Indeed it is becoming ever more difficult to keep track of the expertise and materials needed to build nuclear weapons which almost certainly will find their way into terrorist hands

Closing

Pandora's Box Patrick Glynn,1992-06-09 Glynn American Enterprise Institute argues that the democracies let their faith in disarmament and the rhetoric of peace obscure military realities disguise genuine dangers and promote false hopes until the Reagan administration won the Cold War by rejecting the liberal line on arms control Annotation copyrighted by Book News Inc Portland OR

The Arms Race and Arms Control Stockholm International Peace Research Institute,1982 The Nuclear Arms Race Ann E. Weiss,1983 Discusses the history of the post World War II arms race and the arguments for and against the further development and stockpiling of nuclear weapons

Race to Oblivion Herbert Frank York,1970 Presents an ordinary day in the life of a colorful family living in a doll s house

The Oxford Companion to Politics of the World Joel Krieger,2001-08-02 The world has seen dramatic changes since the publication of the first edition of The Oxford Companion to Politics of the World in 1993 In the post Cold War world globalization now offers wealth and opportunities on a broader scale as well as greater international harmony but threatens to reinforce the advantage gap between wealthy and poor regions and intensify environmental degradation Conflict and squalor expressed in brutal brushfire wars epidemics and chronic underdevelopment vie with equally dramatic accounts of growth and democracy associated with a liberal political order and the global diffusion of trade investment and communications Drawing on the breadth of the first edition this updated edition reflects the changing world with a reassessment of many of the core themes of the Companion and new articles on the people concepts and events that have shaped the world since 1993 The second edition includes biographies of Kofi Annan Tony Blair Bill Clinton and Gerhard Schr der articles on events such as the Rwandan Genocide and the war in Kosovo and coverage of international trade developments such as NAFTA and the World Trade Organization Eighty seven of the 672 articles in the Second Edition are completely new most others are thoroughly revised This edition also features a substantial new set of articles a dozen essays on critical issues written by influential figures Recognizing the importance of including varying viewpoints the editors have commissioned these essays to provide an informed and often passionate debate on controversial topics Discussions include Lani Guinier and Glenn Loury on Affirmative Action Francis Fukuyama and Milton Fisk on the Limits of Liberal Democracy and Lloyd Axworthy and John Bolton on the United Nations The contributors discuss nearly every nation in the world including extensive information on institutions political parties leaders and the sources of political mobilization and conflict The volume also includes biographies of more than seventy five political leaders and thinkers who have shaped the contemporary political world Articles include detailed discussions of critical historical developments and events concepts international law and organizations The Oxford Companion to Politics of the World Second Edition is an accessible timely thought provoking and comprehensive reference that captures the complexity and vitality of contemporary world affairs

Arms Races Nils Petter Gleditsch,Olav Njølstad,1990-02 A long tradition of theoretical and empirical work has been devoted to the question of the driving forces in the arms race since the 1960s This book takes up the internal factors of arms dynamics such as bureaucratic politics interservice rivalry and the military

industrial complex as well as external factors such as interactive arms dynamics between the two superpowers It also deals with the question of technological determinism the ideas that what is technically possible will be done as opposed to the idea that politics is in command Finally factors in the international system affecting arms races are also examined such as long economic waves and power transitions

Some Simple Models of Arms Races Michael D. Intriligator, 1964 The study simplifies the complex structure of arms races in the real world by the assumption of two contenders each having one policy variable weapons stocks With these simplifications arms races are studied by means of reaction curves that indicate optimal weapons stocks given the weapons stocks of the opponent Both classical models are extended to allow for either a deterrent or an arms depriving strategy and constraints on weapons stocks Strategic factors lead to stable points of mutual deterrence or explosive regions in which one side can disarm its opponent and the opponent cannot deter Constraints lead to a high level equilibrium if both sides pursue an arms depriving strategy If both sides then know the constraint of the opponent a low level of weapons holdings would exist guaranteeing for both the same desirable property of the high level equilibrium both sides are prevented from attaining the capability to disarm the opponent The analysis is suggestive only it does not consider the many dimensions of policy Author

The Arms Race and Nuclear War David P. Barash, 1987

March to Armageddon Ronald E. Powaski, 1987 Ronald E Powaski offers the first complete accessible history of the events forces and factors that have brought the world to the brink of a nuclear holocaust He traces the evolution of the nuclear arms race from FDR s decision to develop an atomic bomb to Reagan s decision to continue its expansion in the 1980 s Focusing on the forces that have propelled the arms race and the reasons behind the repeated failures to check the proliferation of nuclear weapons Powaski discusses such topics as the Manhattan Project the decision to drop the bomb on Hiroshima the debate over whether to share atomic information the effect of nuclear weapons on U S military and foreign policy and the role of these weapons in arms control negotiations in the last five presidential administrations
