**Arms and Influence** Thomas C. Schelling, 2009 *Energy Security in the Eastern Mediterranean Region* Floros Flouros, 2022-08-24 This book aims to provide an overview of crucial aspects related to the interconnection between the political economy of energy security and national security which is of great importance globally due to high volatility and complexity In this book contemporary energy issues in relation to the energy security are examined along with main vulnerabilities and challenges that have appeared lately with an impact beyond country borders and with a particular focus on the Eastern Mediterranean region Energy security is studied on both International and European level and finally the Eastern Mediterranean region with special reference to the countries of the State of Israel and the Republic of Cyprus The rapidly changing geopolitical environment makes energy security one of the critical areas of immediate interest that need a holistic approach The importance of energy security in the Eastern Mediterranean region is constantly growing and requires the proper vision to enhance security in the region Energy is now linked to the issues of sustainable development and tackling climate change which is also taken into account Finally this book is expected to contribute to the existing literature and provide an in depth study that gives a fresh approach to the academic and political community *Social Science for Counterterrorism* Paul K. Davis, Kim Cragin, 2009 Employs an interdisciplinary social science approach to various counterterrorism questions problems and policies **Military Coercion and US Foreign Policy** Melanie W. Sisson, James A. Siebens, Barry M. Blechman, 2020-04-23 This book examines the use of military force as a coercive tool by the United States using lessons drawn from the post Cold War era 1991 2018 The volume reveals that despite its status as sole superpower during the post Cold War period US efforts to coerce other states failed as often as they succeeded In the coming decades the United States will face states that are more capable and creative willing to challenge its interests and able to take advantage of missteps and vulnerabilities By using lessons derived from in depth case studies and statistical analysis of an original dataset of more than 100 coercive incidents in the post Cold War era this book generates insight into how the US military can be used to achieve policy goals Specifically it provides guidance about the ways in which and the conditions under which the US armed forces can work in concert with economic and diplomatic elements of US power to create effective coercive strategies This book will be of interest to students of US national security US foreign policy strategic studies and International Relations in general *Secure Or Insecure* Jens Grossklags, 2009 **Books in Print**, 1994 *Coercion, Cooperation, and Ethics in International Relations* Richard Ned Lebow, 2007-05-07 This volume brings together the recent essays of Richard Ned Lebow one of the leading scholars of international relations and US foreign policy Lebow's work has centred on the instrumental value of ethics in foreign policy decision making and the disastrous consequences which follow when ethical standards are flouted Unlike most realists who have considered ethical considerations irrelevant in states calculations of their national interest Lebow has argued that self interest and hence national interest can only be

formulated intelligently within a language of justice and morality The essays here build on this pervasive theme in Lebow's work by presenting his substantive and compelling critique of strategies of deterrence and compellence illustrating empirically and normatively how these strategies often produce results counter to those that are intended The last section of the book on counterfactuals brings together another set of related articles which continue to probe the relationship between ethics and policy They do so by exploring the contingency of events to suggest the subjective and often self fulfilling nature of the frameworks we use to evaluate policy choices
