Around The Community:

    Christianizing Community Life Harry Frederick Ward,Richard Henry Edwards,1917   **Women and Community Action** Dominelli, Lena,2019-05-22 Historically women and men have been assigned to different spaces in their communities Although several decades of feminist social action have made significant progress to the social economic and political condition of many women change has been uneven and there remain considerable advancements to be made globally This valuable third edition considers women s changing position in the world today updating some of the perennial challenges that women face and examining new and emerging issues including digital exclusion sustainable community development and environmental justice Published in association with the British Association of Social Workers this book is an invaluable resource for students and practitioners of social work community work sociology and social policy   **Community Cohesion and Migration** Great Britain. Parliament. House of Commons. Communities and Local Government Committee,2008   Community Engagement in the Online Space Dennis, Michelle,Halbert, James,2023-02-17 Since the advent of the internet online communities have emerged as a way for users to share their common interests and connect with others with ease As the possibilities of the online world grew and the COVID 19 pandemic raged across the world many organizations recognized the utility in not only providing further services online but also in transitioning operations typically fulfilled in person to an online space As society approaches a reality in which most community practices have moved to online spaces it is essential that community leaders remain knowledgeable on the best practices in cultivating engagement Community Engagement in the Online Space evaluates key issues and practices pertaining to community engagement in remote settings It analyzes various community engagement efforts within remote education online groups and remote work This book further reviews the best practices for community engagement and considerations for the optimization of these practices for effective virtual delivery to support emergency environmental challenges such as pandemic conditions Covering topics such as community belonging global health virtual practicum and social media engagement this premier reference source is an excellent resource for program directors faculty and administrators of both K 12 and higher education students of higher education business leaders and executives IT professionals online community moderators librarians researchers and academicians   *A Business Ecology Perspective on Community-Driven Open Source* Markus Radits,2018-11-26 This thesis approaches the phenomenon of open source software OSS from a managerial and organisational point of view In a slightly narrower sense this thesis studies commercialisation aspects around community driven open source The term community driven signifies open source projects that are managed steered and controlled by communities of volunteers as opposed to those that are managed steered and controlled by single corporate sponsors By adopting a business ecology perspective this thesis places emphasis on the larger context within which the commercialisation of OSS is embedded e g global and collaborative production regimes ideological foundations market characteristics and diffuse boundary conditions

Because many business benefits arise as a consequence of the activities taking place in the communities and ecosystems around open source projects a business ecology perspective may be a useful analytical guide for understanding the opportunities challenges and risks that firms face in commercializing OSS There are two overarching themes guiding this thesis The first theme concerns the challenges that firms face in commercialising community driven open source There is a tendency in the literature on business ecosystems and open source to emphasise the benefits opportunities and positive aspects of behaviour at the expense of the challenges that firms face However business ecosystems are not only spaces of opportunity they may also pose a variety of challenges that firms need to overcome in order to be successful To help rectify this imbalance in the literature the first theme particularly focuses on the challenges that firms face in commercialising community driven open source The underlying ambition is to facilitate a more balanced and holistic understanding of the collaborative and competitive dynamics in ecosystems around open source projects The other theme concerns the complex intertwining of community engagement and profit oriented venturing As is acknowledged in the literature the subject of firm community interaction has become increasingly important because the survival success and sustainability of peer production communities has become of strategic relevance to many organisations However while many strategic benefits may arise as a consequence of firm community interaction there is a lack of research studying how the value creating logics of firm community interaction are embedded within the bigger picture in which they occur Bearing this bigger picture in mind this thesis explores the intertwining of volunteer community engagement and profit oriented venturing by focusing on four aspects that are theorised in the literature reinforcement complementarity synergy and reciprocity This thesis is designed as a qualitative exploratory single case study The empirical case is Joomla a popular open source content management system In a nutshell the Joomla case in this thesis comprises the interactions in the Joomla community and the commercial activities around the Joomla platform e g web development consulting marketing customisation extensions In order to achieve greater analytical depth the business ecology perspective is complemented with ideas and propositions from other theoretical areas such as stakeholder theory community governance organizational identity motivation theory pricing and bundling The findings show that the common challenges in commercialising community driven open source revolve around nine distinct factors that roughly cluster into three domains the ecosystem the community and the firm In short the domain of the ecosystem comprises the global operating environment the pace of change and the cannibalisation of ideas The domain of the community comprises the platform policy platform image and the voluntary nature of the open source project And finally the domain of the firm comprises the blurring boundaries between private and professional lives the difficulty of estimating costs and firm dependencies Based on these insights a framework for analysing community based value creation in business ecosystems is proposed This framework integrates collective innovation community engagement and value capture into a unified model of value creation in contexts of firm community interaction Furthermore the findings reveal demonstrable

effects of reinforcement complementarity synergy and reciprocity in the intertwining of volunteer community engagement and profit oriented venturing By showing that this intertwining can be strong in empirical cases where commercial activities are often implicitly assumed to be absent this thesis provides a more nuanced understanding of firm involvement in the realm of open source Based on the empirical and analytical insights a number of further theoretical implications are discussed such as the role of intersubjective trust in relation to the uncertainties that commercial actors face an alternative way of classifying community types the metaphor of superorganisms in the context of open source issues pertaining to the well being of community participants and issues in relation to the transitioning of open source developers from a community based to an entrepreneurial self identity when commercialising an open source solution Furthermore this thesis builds on six sub studies that make individual contributions of their own In a broad sense this thesis contributes to the literature streams on the commercialisation of OSS the business value and strategic aspects of open source the interrelationships between community forms of organising and entrepreneurial activities and the nascent research on ecology perspectives on peer production communities A variety of opportunities for future research are highlighted Denna avhandling unders ker fenomenet ppen k llkod open source ur ett lednings och styrningsperspektiv Mer konkret studeras aspekter p kommersialisering av ett community drivet open source projekt OSS open source software Uttrycket community drivet h nvisar till open source projekt som drivs och styrs av volont rgrupper till skillnad fr n open source projekt som drivs och styrs av enskilda f retag Genom att till mpa ett aff rsekologiperspektiv fokuserar denna avhandling p det vidare sammanhang som karakt riserar kommersialisering av OSS s som globala och kollaborativa produktionssystem v rderingarna ppenhet och samarbete marknadsstrukturer och diffusa organisationsgr nser Aktiviteterna i open source communityn och dess kringliggande ekosystem kan bidra till m nga f rdelar f r f retag och d rf r kan ett aff rsekologiperspektiv vara en anv ndbar analytisk lins f r att f rst de m jligheter utmaningar och risker som f retag st r inf r n r de kommersialiserar OSS Tv vergripande teman lyfts fram i denna avhandling Det f rsta temat handlar om de utmaningar som f retag st r inf r n r de kommersialiserar community driven OSS Det finns i litteraturen om aff rsekologier och open source en tendens att betona f rdelar m jligheter och positiva aspekter p beteende p bekostnad av att unders ka utmaningar som f retag st r inf r Aff rsekologier inneb r dock inte enbart m jligheter f r f retag utan kan ocks orsaka en rad utmaningar som f retag beh ver hantera f r att lyckas Med utg ngspunkt i denna obalans i litteraturen fokuserar det f rsta temat p de utmaningar med kommersialisering av community driven OSS Detta g rs f r att bidra till en mer balanserad och holistisk f rst else av den p samma g ng kollaborativa och konkurrerande dynamiken i aff rsekologin runt ett open source projekt Det andra temat handlar om sammanfl tningen intertwining mellan community deltagande och vinstdrivande verksamhet S som det framg r i litteraturen har fr gan om samverkan mellan f retag och communities blivit allt viktigare eftersom communityernas verlevnad framg ng och h llbarhet har blivit strategiskt viktiga f r m nga organisationer ven om m nga strategiska f rdelar kan uppst
