Arquitectura Y Magia:

ARQUITECTURA Y MAGIA René Taylor, 2006-11-24 Arquitectura y magia es la investigación definitiva del profesor René Taylor sobre los misterios conceptuales que encierra El Escorial. Sostiene Taylor que Felipe II y Juan de Herrera eran hombres de su tiempo y en consecuencia abiertos a ciertas ideas de carácter arcano muy diseminadas entonces entre los individuos más cultos. Ideas que posiblemente influyeron en el desarrollo de El Escorial. En las piedras, en los frescos y aun en la planta de este templo singular perviven según Taylor significados ocultos que solo cabe descifrar con los criterios de quienes entendían la construcción de un edificio como el producto de una operación mágica. El autor complementa este brillante ensayo con varios y curiosos apéndices entre los que figura cierto documento inscrito el Prognosticon un detallado horoscopo que el Dr. Matías Haco Sumbergense escribió para Felipe II. René Taylor, Londres 1916. Ponce 1997. Hispanista de renombre internacional fue discípulo de Wittkower en la Universidad de Londres y director emérito del Museo de Arte de Ponce, Puerto Rico. En 1933 se trasladó a Barcelona hasta el inicio de la guerra civil y en 1941 se doctoró en Londres. Coadutor del volumen Dios arquitecto que integra la edición de El templo de Salomón según Prado y Villalpando. Siruela 1991. Entre sus numerosas aportaciones científicas al mejor conocimiento de la arquitectura española del Renacimiento y del Barroco destacan sus artículos ya clásicos consagrados a Villalpando.

Arquitectura e ilusión Óscar Pedrós Fernández, 2021-05-19. Ser o no ser consciente esa es la cuestión. En arquitectura cualquier acción que pretenda atrapar los sentidos es siempre seductora. Sin embargo cuando esa acción atenta directamente contra las leyes naturales pone en cuestión la base racional sobre la que hemos sido educados. Esas realidades de baja probabilidad han sido exploradas por los ilusionistas para construir ataques psicológicos con base en el conflicto. Por otro lado en arquitectura el *ingenius loci* podría ser definido el conjunto de características del lugar real que contribuyen a construir un lugar imposible mediante un ingenio. Ambas disciplinas, arquitectura e ilusionismo, comparten fundamentos en común: Presentación, Unidad, Incoherencia y Justificación y una serie de herramientas que construyen el efecto: naturalidad, timing, *misdirection* en ilusionismo y cadencia, ritmo y monotonía en arquitectura, entre otras. La intuición de arquitectos e ilusionistas en términos de espacio se traduce en relaciones de vecindad entre ambos cuando estos operan bajo la premisa de lo que no ves no existe. En estas prácticas se establece un diálogo entre estas dos artes ordenando las arquitecturas percibidas desde un conflicto lógico visual, pático u cognitivo. Para ello se recurre a la clasificación convergente de efectos o acontecimientos desde el punto de vista del espectador: Escamoteo, Aparición, Transposición, Roto y recompuesto, Materia a través de materia, Metamorfosis, Características Extraordinarias, Levitación y Pronóstico. La narración parte de un interés personal en ese tipo de situaciones latentes desde la adolescencia al tiempo que establece un vínculo entre dos caminos que por aquel entonces parecían discurrir muy distantes. En una baraja de nueve cartas he querido retratar otros tantos lugares desde el ingenio completamente diferentes en su lenguaje externo pero contruidos sobre los mismos cimientos de esos ataques psicológicos. Y sobre todo intentando no

Tesoro de historia contemporánea de España María Cruz Rubio Liniers, 1999 Tesoro especializado en Historia Contemporánea de España compuesto por 4 101 términos en total de los cuales 3 776 son principales y 325 son sinónimos o equivalentes. Los términos se encuentran estructurados en 11 áreas temáticas. Las relaciones establecidas entre ellos son de jerarquía, equivalencia y asociación. El tesoro consta de un índice alfabético, otro jerárquico y un tercero permutado tipo KWIC. También presenta un anexo con nombres de instituciones, sociedades y partidos políticos españoles de los siglos XIX y XX. Además de este tesoro va precedido de una introducción teórica extensa compuesta por dos partes diferenciadas. En la primera parte se describen las características y peculiaridades del discurso histórico y se analiza la tipología de los términos históricos en un sistema documental. A continuación se presenta un panorama de la documentación histórica. La segunda parte está dedicada a los lenguajes documentales y en ella se analiza el soporte teórico del tesoro como lenguaje controlado planteando ventajas e inconvenientes. También se pasa revista a los distintos lenguajes utilizados en Historia Contemporánea.
