Art Revolution In Latin America:

Art and Revolution in Latin America, 1910-1990 David Craven, 2002 In this uniquely wide ranging book David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy The three great upheavals in Mexico 1910 1940 in Cuba 1959 1989 and in Nicaragua 1979 1990 were defining moments in twentieth century life in the Americas Craven discusses the structural logic of each movement s artistic project by whom how and for whom artworks were produced and assesses their legacies In each case he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders The book examines not only specific artworks originating from each revolution s attempt to deal with the challenge of socializing the arts but also the engagement of the working classes in Mexico Cuba and Nicaragua with a tradition of the fine arts made newly accessible through social transformation Craven considers how each revolution dealt with the pressing problem of creating a dialogical art one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were In addition the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as John Dewey and Paulo Freire The book provides a fascinating new view of the Latin American revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of society Publisher s description

Latin American Art at The Museum of Modern Art Miriam M. Basilio Gaztambide, 2025-06-13

This book sheds light on an as yet unstudied aspect of The Museum of Modern Art s MoMA preeminent role in establishing the definition of the problematic term Latin American art in the United States from the 1930s to the present through its collection displays In examining the shifting categorization of Latin American works according to stylistic and geographic taxonomies we gain a greater understanding of the organization of the Museum s collections as a whole during the 1940s and 1950s This book is the first to document these institutional precedents crucial for the understanding of the articulation of a Modernist canon and its contested legacy today The MoMA is widely recognized as the preeminent institution that defined 20th century art through its collection shaping our understandings of the history of art with its hierarchies and exclusions as they sediment over time MoMA s holdings of art from Latin America shed light on a key period when the stylistic categories that have since come to be accepted by many today as the Modernist canon developed MoMA s collection displays suggest ways in which artists from areas of the world formerly excluded can be incorporated within today s increasingly global museums MoMA s approach may be compared to initiatives adopted by several museums since the 2000s creating geographically defined curatorial positions as a way to redress gaps in collecting art from Latin America and other areas of

the world In this book author Miriam M Basilio Gaztambide offers a closer study of the history of collection displays as a means to understand canon formation in modern art museums This work will be of interest to those researching Latin American American modern and contemporary art and curatorial and museum studies **The New World Guides to the Latin American Republics: Mexico, Central America and the West Indies** Earl Parker Hanson, Raye Roberts Platt, 1945

African Diaspora in the Cultures of Latin America, the Caribbean, and the United States Persephone Braham, 2014-12-05 Scholars of the African Americas are sometimes segregated from one another by region or period by language or by discipline Bringing together essays on fashion the visual arts film literature and history this volume shows how our understanding of the African diaspora in the Americas can be enriched by crossing disciplinary boundaries to recontextualize images words and thoughts as part of a much greater whole Diaspora describes dispersion but also the seeding sowing or scattering of spores that take root and grow maturing and adapting within new environments The examples of diasporic cultural production explored in this volume reflect on loss and dispersal but they also constitute expansive and dynamic intellectual and artistic production neither wholly African nor wholly American in the hemispheric sense whose resonance deeply inflects all of the Americas African Diaspora in the Cultures of Latin America the Caribbean and the United States represents a call for multidisciplinary collaborative and complex approaches to the subject of the African diaspora **Revolution and State in Modern Mexico** Adam David Morton, 2013-10-04 Now in an updated edition this groundbreaking study develops a new approach to understanding the formation of the postrevolutionary state in Mexico In a shift away from dominant interpretations Adam David Morton considers the construction of the revolution and the modern Mexican state through a fresh analysis of the Mexican Revolution the era of import substitution industrialization and neoliberalism Throughout the author makes interdisciplinary links among geography political economy postcolonialism and Latin American studies in order to provide a new framework for analyzing the development of state power in Mexico He also explores key processes in the contestation of the modern state specifically through studies of the role of intellectuals democratization and democratic transition and spaces of resistance As Morton argues all these themes can only be fully understood through the lens of uneven development in Latin America Centrally the book shows how the history of modern state formation and uneven development in Mexico is best understood as a form of passive revolution referring to the ongoing class strategies that have shaped relations between state and civil society As such Morton makes an important interdisciplinary contribution to debates on state formation relevant to Mexican studies postcolonial and development studies historical sociology and international political economy by revitalizing the debate on the uneven and combined character of development in Mexico and throughout Latin America In so doing he convincingly contends that uneven development can once again become a tool for radical political economy analysis in and beyond the region A substantive new epilogue engages the main theoretical debates that have emerged since the book was first published while also exploring the dominant

geographies of power and resistance that are shaping state space in Mexico in the twenty first century And now a Spanish edition *Revolución y Estado en México moderno México D F Siglo XXI* 2017 is available as well Click here to see the book trailer

Art of Latin America, 1900-1980 Marta Traba, 1994 When Marta

Traba died in a plane crash outside Madrid on November 27 1983 the art world lost one of its most distinguished and most outspoken contemporary critics The focus of stormy controversy in the UK when she was denied residency by the Reagan administration because of her political views Traba had been active for decades in the field of art criticism She was on her way to a symposium in Bogota where she and her husband Angel Rama were to be guests of honour when she died The manuscript of the present book was recovered after her death In *Art of Latin America* Marta Traba offers new insights into the work of Latin America's most significant 20th century artists She argues for instance that the Mexican Muralist Movement traditionally seen as a consequence of the Mexican Revolution in fact reflected a new attitude toward art which had its origins in European Modernism She shows how countries with significant numbers of European immigrants such as Argentina Brazil and Mexico became centres of lively experimentation in matters of form while countries with large Indian populations were more subject to the movement's political influence She also examines the growing Latin American avant garde of the 1950s and the subsequent reaction to it that led to a renewal of drawing and printmaking Illustrated with more than 100 full colour reproductions of some of the finest works of 20th century Latin American art this book should be of interest not only to art historians and students of Latin America but to all with an interest in contemporary art
