## **Dublin In Bloomtime:**

**Dublin in Bloomtime: the City James Joyce Knew** Cyril Pearl, 1969     James Joyce, Urban Planning and Irish Modernism L. Lanigan, 2014-08-08 Irish writing in the modernist era is often regarded as a largely rural affair engaging with the city in fleeting often disparaging ways with Joyce cast as a defiant exception This book shows how an urban modernist tradition responsive to the particular political social and cultural conditions of Dublin emerged in Ireland at this time

**Joyce and the Law** Jonathan Goldman, 2020-01-15 Making the case that legal issues are central to James Joyce's life and work international experts in law and literature offer new insights into Joyce's most important texts They analyze *Dubliners* *A Portrait of the Artist as a Young Man* *Giacomo Joyce* *Ulysses* and *Finnegans Wake* in light of the legal contexts of Joyce's day Topics include marriage laws the Aliens Act of 1905 laws governing display and use of language minority rights debates municipal self government rentier culture and regulations on alcohol consumption and licensing This volume also highlights Joyce's own fascination with law and legal inquiry and explores how by adopting a unique visual and linguistic style Joyce constructed an authorial identity that mirrored the process of trademark It also offers a deeper understanding of Judge John Woolsey's decision in the *Ulysses* obscenity case and reveals the many ways copyright has affected publication of Joyce's work and the scholarly and aesthetic use of his words These discussions show how reading Joyce alongside the law enriches both legal studies and literary scholarship A volume in the Florida James Joyce Series edited by Sebastian D G Knowles

Making Space in the Works of James Joyce Valerie Benejam, John Bishop, 2012-05-23 James Joyce's preoccupation with space be it urban geographic stellar geometrical or optical is a central and idiosyncratic feature of his work In *Making Space in the Works of James Joyce* some of the most esteemed scholars in Joyce studies have come together to evaluate the perception and mental construction of space as it is evoked through Joyce's writing The aim is to bring together several recent trends of literary research and criticism to bear on the notion of space in its most concrete sense The essays move dialectically out of an immediate focus on the phenomenological and intra psychic into broader and wider meditations on the social urban and collective As Joyce's formal experiments appear the response to the difficulty of enunciating truly the experience of lived space this eventually leads us to textual and linguistic space The final contribution evokes the space with which Joyce worked daily that of his manuscripts or what he called paperspace With essays addressing all of Joyce's major works this volume is a critical contribution to our understanding of modernism as well as of the relationship between space language and literature

Novels, Maps, Modernity Eric Bulson, 2017-09-25 This book examines how readers and novelists alike have used maps guidebooks and other geographical media to imagine and represent the space of the novel from the mid nineteenth century to the present

**Me++** William J. Mitchell, 2004-09-17 How the transformation of wireless technology and the creation of an interconnected world are changing our environment and our lives With *Me* the author of *City of Bits* and *e topia* completes an informal trilogy examining the ramifications of information technology in everyday life William

Mitchell describes the transformation of wireless technology in the hundred years since Marconi the scaling up of networks and the scaling down of the apparatus for transmission and reception It is he says as if Brobdingnag had been rebooted as Lilliput Marconi s massive mechanism of tower and kerosene engine has been replaced by a palm size cellphone If the operators of Marconi s invention can be seen as human appendages to an immobile machine today s hand held devices can be seen as extensions of the human body This transformation has in turn changed our relationship with our surroundings and with each other The cellphone calls from the collapsing World Trade Center towers and the hijacked jets on September 11 were testimony to the intensity of this new state of continuous electronic engagement Thus Mitchell proposes the trial separation of bits the elementary unit of information and atoms the elementary unit of matter is over With increasing frequency events in physical space reflect events in cyberspace and vice versa digital information can for example direct the movement of an aircraft or a robot arm In Me Mitchell examines the effects of wireless linkage global interconnection miniaturization and portability on our bodies our clothing our architecture our cities and our uses of space and time Computer viruses cascading power outages terrorist infiltration of transportation networks and cellphone conversations in the streets are symptoms of a dramatic new urban condition that of ubiquitous inescapable network interconnectivity He argues that a world governed less and less by boundaries and more and more by connections requires us to reimagine and reconstruct our environment and to reconsider the ethical foundations of design engineering and planning practice
