At Liberty to Die Howard Ball,2012-06-11 Ball s arguments are concise compelling and backed with considerable case law This volume is highly recommended for upper level undergraduates and above in law philosophy and the medical humanities interested in the right to die debates Summing up Highly recommended Choice Over the past hundred years average life expectancy in America has nearly doubled due largely to scientific and medical advances but also as a consequence of safer working conditions a heightened awareness of the importance of diet and health and other factors Yet while longevity is celebrated as an achievement in modern civilization the longer people live the more likely they are to succumb to chronic terminal illnesses In 1900 the average life expectancy was 47 years with a majority of American deaths attributed to influenza tuberculosis pneumonia or other diseases In 2000 the average life expectancy was nearly 80 years and for too many people these long lifespans included cancer heart failure Lou Gehrig s disease AIDS or other fatal illnesses and with them came debilitating pain and the loss of a once full and often independent lifestyle In this compelling and provocative book noted legal scholar Howard Ball poses the pressing question is it appropriate legally and ethically for a competent individual to have the liberty to decide how and when to die when faced with a terminal illness At Liberty to Die charts how the right of a competent

terminally ill person to die on his or her own terms with the help of a doctor has come deeply embroiled in debates about the relationship between religion civil liberties politics and law in American life Exploring both the legal rulings and the media frenzies that accompanied the Terry Schiavo case and others like it Howard Ball contends that despite raging battles in all the states where right to die legislation has been proposed the opposition to the right to die is intractable in its stance Combining constitutional analysis legal history and current events Ball surveys the constitutional arguments that have driven the right to die debate Assisted Dying Jo Cartwright, Lesley Ann Close, 2014-07-01 The latest developments in the arguments for and against assisted dying with a foreword by Terry Pratchett Assisted dying is perhaps one of the most divisive issues of the modern age generating endless headlines and moral debates Published in conjunction with the organization Dignity in Dying this important book provides a forum for expert commentators in a variety of fields including religion and medicine to explore whether the most humane response to the torment and helplessness of certain severely incapacitated individuals is to assist them in their wish to die This collection is edited by two proponents of greater choice at the end of life and all the contributors support the need to change the law Starting from a position that the current legal situation is untenable detailed case studies shed light on the negative consequences of the current state of the law which forbids assisted dying and the lack of choices offered to dying people who are suffering intolerably at the moment The book's case studies punctuate chapters written by a variety of authors about different aspects of the subject these chapters attempt to address the concerns raised by the case studies **Textbook of Palliative Care** Roderick Duncan MacLeod, Lieve Van den Block, 2025-02-25 This second edition provides the most up to date information on all aspects of palliative care including recent developments including COVID 19 global policies service provision symptom management professional aspects organization of services palliative care for specific populations palliative care emergencies ethical issues in palliative care research in palliative care public health approaches and financial aspects of care This new Textbook of Palliative Care remains a unique comprehensive clinically relevant and state of the art book aimed at advancing palliative care as a science a clinical practice and as an art Palliative care has been part of healthcare for over fifty years but it still needs to be explained to many Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families However the science of palliative care is advancing and this new edition will contribute to a better understanding This new edition offers 86 updated or new chapters out of 108 written by experts in their given fields providing up to date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be We present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care The Textbook includes sections addressing aspects such as symptom management and care provision organization of care in different settings care in specific disease groups palliative care

Leming,George E. Dickinson,2007 Using a social psychological approach this edition remains solidly grounded in theory and research but places greater emphasis on the individual and coping with death and dying These two well known authors and researchers integrate stimulating personal accounts throughout the text and apply concepts to specific examples that deal with cross cultural perspectives and the practical matters of death and dying

Death with Dignity Robert L. Risley,1989 One of the most significant controversial issues of our time is voluntary euthanasia do we have the right when dying with unbearable suffering to ask a physician for assistance in suicide At present such an action is against the law in all Western societies except the Netherlands where it is permitted though not actually legalized Robert L Risley is a Los Angeles lawyer who was principal author of the Death With Dignity Act which when passed will permit lawful physician aid in dying In this book Mr Risley explains the background to the new law why it is necessary tackles the critics who claim that is a slippery slope back to conduct similar to Nazi Germany The entire Death With Dignity Act is an appendix **Death Talk** Margaret A. Somerville,2001-12-14 There are vast ethical legal and social differences between natural death and euthanasia In Death Talk Margaret Somerville argues that legalizing euthanasia would cause irreparable harm to society s value of respect for human life which in secular societies is carried primarily by the institutions of law and medicine

American Philosophical Quarterly Nicholas Rescher,1995 To Die Or Not to Die? Arthur S. Berger,Joyce Berger,1990-11-30 Dramatic advances in medical technology make it possible to keep an individual alive well after life would otherwise be untenable These medical advances raise complex and disturbing questions about the appropriateness of allowing or even helping a person to die This provocative new book provides guidelines for dealing with the sensitive legal and ethical issues surrounding an individual s right to die Designed to give a global perspective on these contemporary issues To Die or Not to Die integrates the ideas and experiences of ten authorities from different disciplines cultures and legal systems recognizing that no single discipline offers an insight that is broad enough to solve the problems caused by rapidly changing medical technology The book discusses the issues in a comprehensive manner integrating the attitudes of various cultures and investigates the approaches and solutions of several different legal systems Challenging

many commonly held views on the issues surrounding an individual's right to die this book builds a new foundation for thinking or rethinking these controversial questions It allows the reader to consider new and diverse perspectives side by side for the first time Valuable appendices supply references statutes judicial decisions and important forms for more detailed study To Die or Not to Die will prove stimulating reading for professionals in medicine nursing theology law public health and the disciplines of philosophy ethics psychology and sociology *Death, Dying, and the Law* James T.
