Seitz, Martin Klubeck, Dr Michael Poulin, Jude Chagas Pereira, Michael Blaha, J. Bryan Lail, Patrik Maltusch, Darius Silingas, David Rice, Michael S. Connor, 2019-10-23 The chapters in this book are contributed by visionaries who see the need for business leaders to define their organizations to be agile and robust in the face of external changes The goal is to build something knowing that it will be changed so that you have no need to go back to the metaphorical drawing board for every market condition change In his Foreword Keith Swenson asks you Consider what it means to say that the business will adapt in the face of external changes The business architecture is not simply a model that specifies how to run the business for now and the next few years The people making the architecture cannot know the pressures that will be faced Instead it must support leaders and executives within the organization to make consistently good decisions on how to adapt their practices The architecture is not a plan

that anticipates all the decisions instead it embodies a set of core guiding principles that enable decision making Understand that the term business used this way is not limited to for profit enterprises but includes all forms of organizations that have a strategic need to accomplish goals Pragmatically speaking business architecture is the conceptual understanding that people have on why particular choices were made in forming the organization in a particular way This book will help you understand your options and how to relate them to your own organization
