## **Dynamic Entrepreneurship In Central And Eastern Europe:**

**Dynamic Entrepreneurship in Central and Eastern Europe** Derek F. Abell, Thomas Köllermeier, 1993 Small Firms and Entrepreneurship in Central and Eastern Europe Oliver Pfirrmann, Günter H. Walter, 2012-12-06 Much of the research on transformation transition in Central and Eastern European Countries CEECs focuses on macroeconomic issues inflation economic growth employment Little research has been devoted so far to microeconomic analysis Recently the issue of new enterprises and firm founders has moved to the centre of economic and policy considerations Readers of this book will learn about the role played by these firms in the transformation of central and eastern European countries The book also includes contributions from Central and Eastern Europe on which little or no investigation has been performed until now Yugoslavia Romania Slovakia *The Dynamics of Entrepreneurship* Maria Minniti, 2013-02-14 As governments across the world look to entrepreneurship as a way to increase the wealth and well being of their countries this volume brings together leading scholars to provide a comprehensive overview of entrepreneurial activity based on empirical data *Entrepreneurship and Small Business Research in Europe* Hans Landström, Hermann Frank, José Maria Veciana, 1997 A collection of articles reviewing entrepreneurship and small business research in 16 European countries The authors describe analyze and reflect on the research topics being addressed in their country including an assessment of the most popular theoretical approaches This also leads to an evaluation of research design identification of the main research centres discussion of strengths and weaknesses of research and recent trends Venture Capital & Entrepreneurship in Central & East Europe EC PHARE Programme, European Foundation for Entrepreneurship Research, EVCA (Association), 1994 **Small Businesses Trickling Up in Central and Eastern Europe** Galen Spencer Hull, 2013-01-11 First published in 1999 Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region This book argues that the small and medium sized enterprise SME sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state owned enterprises Since then a process of liberalization has been unleashed to promote free market policies This has involved programs of privatization and restructuring of public enterprises as well as the promotion of policies to enable a private sector to develop Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their work force In some countries of the region this process is much further along than in others However the SME sector has developed at a more rapid pace than has the privatization of the large public companies There has been a flurry of new enterprises springing up throughout the region which are trickling up in a frequently hostile environment against tremendous odds and yet managing to have a pronounced impact on their respective economies Small businesses have taken over in sectors that used to be dominated by big enterprises primarily in services and consumer products They have provided a crucial outlet for pent up entrepreneurial

talent that had remained dormant during the long period of state domination This work urges legislators policy makers and development agencies alike to take account of the importance of the SME s in their legislation and planning Given a more favorable environment these small businesses will provide even greater impetus for economic growth Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit seekers as unscrupulous and selfish If the CEE region is to achieve its full potential of economic growth policies and support mechanisms to promote the SME sector will be needed to assure a favorable environment
