INTERNATIONAL JOURNAL OF INDUSTRIAL ORGANIZATION, 2003 Nursery Cities Gilles Duranton, Diego Puga, 2000 **Environmental Management and the Competitiveness of Nature-based Tourism Destinations** Twan Huybers, Jeff Bennett, 2002 Environmental management can add to the costs of nature based tourism businesses making destinations less competitive but can also enhance competitiveness by increasing demand This text assesses the importance of these effects on a variety of destinations including California Provence North Queensland The British National Bibliography Arthur James Wells, 2001 *The Global Challenge to Industrial Districts* Paolo Guerrieri, Simona Iammarino, Carlo Pietrobelli, 2001 The current trend towards globalization is posing a substantial challenge to SME clusters to restructure and reach out to distant markets and knowledge sources while at the same time exploiting the advantages of local factors and agglomeration This book represents a first attempt to analyze these issues in detail employing novel empirical evidence The authors focus on Small and Medium sized Enterprises SMEs in Italy and Taiwan two countries in which these businesses characterize the national industrial structure They find that in the current climate of globalization there is no best practice model for organizing an industrial cluster since a diversity of successful institutional arrangements is possible They demonstrate that over time SME clusters can evolve and that globalization can reshape their upgrading options by providing a variety of international knowledge linkages Thus the authors conclude that the development of local and global networks and new interactive modes of knowledge creation which have co evolved as a result of globalization have provided the necessary conditions for competitive survival Taking a multidisciplinary approach the authors utilize a number of analytical tools to evaluate their survey data and present an original comparison between the experiences of two countries that are facing the challenges of globalization often with differing strategies This book will be of great interest to industrial and international economists policymakers and corporate and SME managers *Industrial Clusters, Upgrading and Innovation in East Asia* Akifumi Kuchiki, Masatsugu Tsuji, 2011 This lucid and informative book analyzes the problems of clusters in transition through studies of agglomerations at different stages of development in various East Asian countries The contributors reconsider industrial cluster policy within a more dynamic and long term framework and explore how regional transformations can bring new insights to the theory of agglomeration and innovation By identifying the factors and policies to promote upgrading the authors establish the theoretical and policy basis for transforming industrial clusters from production oriented to innovation oriented agglomerations They also study the important structural changes in the region such as FTAs and the role of the WTO and the consequent effects on clusters Researchers and students of Asian economics industrial clusters and innovation will find this

incisive book invaluable It will also prove to be a compelling read for policy makers in developing countries or international development organizations Contributors include V Ammarapala P Chongphaisal T Gokan X He B Hu C Jeenanunta S Komolavanij R Liu S D Meyanathan S Miyahara M Suzuki
