Dynamic Policies Of The Firm:

Dynamic Policies of the Firm Onno van Hilten, Peter M. Kort, Paul J.J.M. van Loon, 2012-12-06 In this book we open our insights in the Theory of the Firm obtained through the application of Optimal Control Theory to a public of scholars and advanced students in economics and applied mathematics We walk on the micro economic side of the street that is bordered by Theory of the Firm on one side and by Optimal Control Theory on the other keeping the reader away from all the dead end roads we turned down during our 10 years lasting research We focus attention on the expressiveness and variety of insights that are obtained through studying only simple models of the firm In this book mathematics is our tool insight in optimal corporate policy our goal Therefore most of the mathematics and calculations is put into appendices and in the main text all attention is on modelling corporate behaviour and on analysing the results of the calculations So the main text focusses on micro economics even more specific on Theory of the Firm In that way this book is contrasted from such famous text books in applied Optimal Control with a much broader portfolio of applications like Feichtinger Hartl 1986 or with a more rigorous introduction into theory like Seierstad Sydsaeter 1987
