Dreyfus,1964 This memorandum presents an approach to the nonparametric simple problem of the calculus of variations that is in the spirit of dynamic programming Under the assumptions that the functions that define minimizing curves exhibit a certain regularity in their behavior differentiability properties of the optimal value function  $W$  are determined Then the fundamental partial differential equation of dynamic programming is obtained and the necessary conditions of the calculus of variations with the exception of Jacobi's condition are deduced as immediate corollaries Author **Introduction To The Calculus of Variations And Its Applications** Frederic Wan,2017-10-19 This comprehensive text provides all information necessary for an introductory course on the calculus of variations and optimal control theory Following a thorough discussion of the basic problem including sufficient conditions for optimality the theory and techniques are extended to problems with a
