Dynamic Factors In Economic Growth

Paul Ke-chih Liu

Dynamic Factors In Economic Growth:

Dynamic Factors in Economic Growth William Arthur Lewis, 1974 *On the economic policy of developing nations*

development and environmental economics, *Copyright Industries and the Impact of Creative Destruction* Jiabo Liu, 2013 This book examines the relationship between the legal extension of copyright duration as an enduring means of copyright protection and the growth of the UK book publishing industry as a typical creative industry reliant on copyright. The book draws on Schumpeter's theory of creative destruction to analyse the implications of copyright law and policy on the book industry and illustrate the dynamic interaction between copyright expansion and the growth of the creative industries. The book reviews the historical development of UK copyright expansion and also considers copyright in the digital age. It explores the legal and economic concerns about copyright protection in general and the expansion of copyright duration in particular. Using an innovative empirical method it explores whether the expansion of the duration of copyright promotes or precludes the growth of book publishing industry. It goes on to suggest changes to copyright policy which would have an impact on the economics of innovation in the creative industries. This book will be of particular interest to scholars and students of Intellectual Property Law.

Dynamic Factor Demand in a Rationing Context Werner Smolny, 2012-12-06 A macroeconomic disequilibrium model is developed for the Federal Republic of Germany. Starting with a microeconomic model of firm's behaviour the optimal dynamic adjustment of employment and investment is derived. The model of the firm is complemented by an explicit aggregation procedure which allows to derive macroeconomic relations. The model is estimated with macroeconomic data for the Federal Republic of Germany. An important feature is the consistent introduction of dynamic adjustment into a model of the firm. A new method is the particular approach of a delayed adjustment of employment and investment. The estimation results show significant underutilizations of labour and capital and indicate the importance of supply constraints for imports and exports. As the most prominent result they reveal the importance of the slow adjustment of employment and investment for the macroeconomic situation in Germany and especially for the persistence of high unemployment in the eighties.

Dynamic Factor Models Siem Jan Koopman, Eric Hillebrand, 2016-01-08 This volume explores dynamic factor model specification asymptotic and finite sample behavior of parameter estimators identification frequentist and Bayesian estimation of the corresponding state space models and applications.

The Dynamics of Socio-Economic Development Adam Szirmai, 2005-01-20 Why are poor countries poor and rich countries rich? How are wealth and poverty related to changes in nutrition health life expectancy education population growth and politics? This modern non-technical 2005 introduction to development studies explores the dynamics of socio-economic development and stagnation in developing countries. Taking a quantitative and comparative approach to contemporary debates within their broader context Szirmai examines historical institutional demographic sociological political and cultural factors. Key chapters focus on economic growth technological change industrialisation agricultural development and consider social dimensions.

such as population growth health and education Each chapter contains comparative statistics on trends from a sample of twenty nine developing countries This rich statistical database allows students to strengthen their understanding of comparative development experiences Assuming no prior knowledge of economics the book is suited for use in inter disciplinary development studies programmes as well as economics courses and will also interest practitioners pursuing careers in developing countries

The Social Science Encyclopedia Adam Kuper,2003-12-16 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on the key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

ICT Investment for Energy Use in the Industrial Sectors Nabaz T. Khayyat,2017-06-20 This book investigates the impact of production input factors on the market consumer and producer energy demand characteristics in 30 industrial sectors for South Korea over the period 1980 2009 and for Japan over the period 1973 2006 with special emphasis placed on the effects of ICT investment on the demand for energy A dynamic factor demand model is developed accounting for the adjustment costs that are defined in terms of forgone output from current production It addresses four key aspects of production and energy demand in manufacturing first it establishes the various relationships between different factors of production Second it investigates whether the energy demand in the industrial sectors in South Korea would be decreased or increased by substituting complementing with other input factors such as ICT capital and labor Third it looks at sources of growth in the industrial sectors through decomposing the Divisia index based total factor productivity TFP Finally it provides appropriate policy recommendations based on these findings The results of this study may provide industrial sectors stakeholders and environmental and industrial policy makers with a flexible model that has the capacity to assess outcomes of various policies

under certain scenarios The factor demand methodology described in this book is very advanced and up to date It can be used when teaching advanced graduate courses and in empirically advanced research Therefore it is highly relevant in both teaching as a main or supplementary text and in particular as a reference handbook in conducting empirical research The focus on ICT effects on energy use makes this book an important addition to the existing literature on industrial development
