Dynamics In Human And Primate Societies Agent Based Modeling Of Social And Spatial Processes:

Dynamics in Human and Primate Societies Timothy A. Kohler, George G. Gumerman, 2000-02-10 As part of the SFI series this book presents the most up to date research in the study of human and primate societies presenting recent advances in software and algorithms for modeling societies It also addresses case studies that have applied agent based modeling approaches in archaeology cultural anthropology primatology and sociology Many things set this book apart from any other on modeling in the social sciences including the emphasis on small scale societies and the attempts to maximize realism in the modeling efforts applied to social problems and questions It is an ideal book for professionals in archaeology or cultural anthropology as well as a valuable tool for those studying primatology or computer science

Agent-based Modeling and Simulation in Archaeology Gabriel Wurzer, Kerstin Kowarik, Hans Reschreiter, 2014-11-08 Archaeology has been historically reluctant to embrace the subject of agent based simulation since it was seen as being used to re enact and visualize possible scenarios for a wider generally non scientific audience based on scarce and fuzzy data Furthermore modeling in exact terms and programming as a means for producing agent based simulations were simply beyond the field of the social sciences This situation has changed quite drastically with the advent of the internet age Data it seems is now ubiquitous Researchers have switched from simply collecting data to filtering selecting and deriving insights in a cybernetic manner Agent based simulation is one of the tools used to glean information from highly complex excavation sites according to formalized models capturing essential properties in a highly abstract and yet spatial manner As such the goal of this book is to present an overview of techniques used and work conducted in that field drawing on the experience of practitioners

Thinking through Archaeological Complexity Stefani A. Crabtree, 2025-10-31 Thinking Through Archaeological Complexity explores how archaeologists can engage with complex adaptive systems examining dynamic interactions between humans and environments across space and through time It offers a roadmap for integrating theory method and data through a complexity science lens This volume bridges archaeology and complexity science offering a transdisciplinary framework for understanding long term socio ecological dynamics It provides a substantive overview of how complex adaptive systems science is used in archaeology Drawing from case studies in the Ancestral Pueblo Southwest it demonstrates how tools like agent based modeling ecological and social network analysis and settlement scaling reveal emergent patterns in the archaeological record The book critically examines concepts such as resilience adaptation innovation and transformation offering alternatives to overly linear narratives Emphasizing methodological transparency it provides practical guidance for scholars interested in modeling data integration and working across disciplinary boundaries while grounding in theoretical pluralism By situating archaeological knowledge within broader scientific conversations the book encourages readers to reimagine the past not as static or collapsed but as complex entangled and instructive for contemporary challenges This book is essential reading for students researchers and practitioners in archaeology as well as complexity science It will also appeal

to scholars in anthropology environmental studies geography and network science interested in long term human environmental dynamics and the application of complex systems approaches in historical contexts Reclaiming a Scientific Anthropology Lawrence A. Kuznar,2008-09-05 Lawrence Kuznar makes a compelling case that it is even more important today a decade after the publication of the first edition of Reclaiming a Scientific Anthropology for anthropology to return to its roots in empirical science Uncertainty and Sensitivity Analysis in Archaeological Computational Modeling Mariëka Brouwer Burg,Hans Peeters,William A. Lovis,2016-05-18 This volume deals with the pressing issue of uncertainty in archaeological modeling Detecting where and when uncertainty is introduced to the modeling process is critical as are strategies for minimizing reconciling or accommodating such uncertainty Included chapters provide unique perspectives on uncertainty in archaeological modeling ranging in both theoretical and methodological orientation The strengths and weaknesses of various identification and mitigation techniques are discussed in particular sensitivity analysis The chapters demonstrate that for archaeological modeling purposes there is no quick fix for uncertainty indeed each archaeological model requires intensive consideration of uncertainty and specific applications for calibration and validation As very few such techniques have been problematized in a systematic manner or published in the archaeological literature this volume aims to provide guidance and direction to other modelers in the field by distilling some basic principles for model testing derived from insight gathered in the case studies presented Additionally model applications and their attendant uncertainties are presented from distinct spatio temporal contexts and will appeal to a broad range of archaeological modelers This volume will also be of interest to non modeling archaeologists as consideration of uncertainty when interpreting the archaeological record is also a vital concern for the development of non formal or implicit models of human behavior in the past **The Changing Face of Disease** C.G. Nicholas Mascie-Taylor,Jean Peters,Stephen T. McGarvey,2004-02-11 Disease is an ever present threat faced by all human societies Today this concept has become an influential area of study known as the global burden of disease which encompasses contemporary health concerns such as the economic costs of disease the societal impact of illness in developing nations and infectious diseases resulting from lifestyle **Proceedings of the National Academy of Sciences of the United States of America** National Academy of Sciences (U.S.),2002 *Environmental Change and Human Adaptation in the Ancient American Southwest* David Elmond Doyel,Jeffrey S. Dean,2006 This volume contains a varied and instructive set of studies of human behavioral adaptation to environmental change in the ancient Southwest making significant contributions to southwestern prehistory settlement pattern studies agriculture behavioral ecology paleo environmental reconstruction and statistical and computer aided modeling Beyond Illustration Bernard Frischer,Anastasia Dakouri-Hild,2008 This volume contains thirteen papers which demonstrate the usefulness of 2D and 3D digital modelling in archaeology which as the title states goes well beyond simply producing illustrative site maps but can be used as a creative form of experimental archaeology **Proceedings of the 4th Annual Swarm User Group Meeting**

William C. Pitt,2001 **Theory, Method, and Practice in Modern Archaeology** Robert J. Jeske,Douglas K. Charles,2003-03-30 This book presents 18 essays by leading scholars covering mortuary analysis the archaeology of foraging and agricultural societies cultural evolution and archaeological method and theory which transcend the processual postprocessual debate in archaeology and provide examples of how archaeologists think about and go about studying the past As archaeology encounters the 21st century debate over the nature of the discipline dominates professional discourse Archaeologists are embattled over isms processualism postprocessualism scientism and humanism are ubiquitous buzzwords in the literature Yet archaeology is a craft practiced by individuals learned from and influenced by other individuals Sometimes a person through sheer force of intellectual spirit rises above the debate to make a mark on the field in ways that cross out schools paradigms and factions It is fitting to look back at the influence one such individual has had on archaeological methods theory data collection and syntheses over the last half century This volume draws on the experience of students and colleagues who worked with and were strongly influenced by James A Brown s approach to the past The volume is divided into five categories each reflecting one distinctive facet of Brown s affect on archaeology mortuary analysis foraging and horticultural societies complex agriculturalists proto historic and historic societies and method and theory These diverse categories with articles by archaeologists of many backgrounds are drawn together by the threads of Brown s intellectual legacy Not all authors here are in agreement with Brown s views on their subjects but all acknowledge that his work in the area sets a standard that needs to be met if one is to succeed One Hundred Years of American Archaeology in the Middle East Douglas R. Clark,Victor Harold Matthews,2003 Twenty four essays by leading scholars review the results of a century of North American archaeological research in the Middle East conducted under the auspices of the American Schools of Oriental Research The contributors consider each of the major historical archeological periods in the Ancient Near East and discuss cultural issues such as technology religion and economic and political realities **Annual Egyptological Bibliography** ,2004 **The Archaeology and Art of Ancient Egypt** Zahi A. Hawass,Janet E. Richards,2007 A major international scholarly publication **Inside the City in the Greek World** Sara Owen,Laura Preston,2009 The publication of the papers presented in this volume marks an important step in the study of ancient cities Despite having long been a focus of archaeological investigation and analysis until relatively recently they have tended to be described rather than analysed These eleven papers concentrate on analysing ancient urban centres from within exploring some of the ways in which people lived in perceived and modified their built environments The papers span several time periods from the Bronze Age to the Hellenistic era as well as geographic locations from Italy to Beirut The title of this volume thus incorporates two meanings of Greek the territory of the modern nation state and areas of the ancient world with cultural influences from the Aegean The diversity of ancient urban forms is therefore fully recognised and celebrated A Secondary Center in the Valley of Oaxaca, Mexico Christina M. Elson,2003 **Proceedings of the First Workshop on E-Business** Chih-ping

Wei,2002 Tools and Techniques for Social Science Simulation Ramzi Suleiman,2000-02-11 This book provides an overview of social science simulation as a tool for modelling and theory building It is shown how simulation may be applied to the analysis of social and economic problems using techniques such as multi agent simulation cellular automata and multi level modelling Particular attention is paid to the sensitivity analysis of model parameters The book also describes the architecture and user interfaces of several simulation tools The book is based on an international conference that brought together social scientists and computer scientists engaged in a wide range of simulation approaches It represents a report on the state of the art in social science simulation **Handbook of Archaeological Sciences** D. R. Brothwell,A. M. Pollard,2001-08-17 D R Brothwell and A M Pollard have got together to create the first large scale review of the many sciences which contribute to modern archaeology for over 30 years The Handbook of Archaeological Sciences is intended to bring together a substantial overview of the sciences in archaeology in one complete volume The book is organised under eight broad headings dating quaternary palaeoenvironments human palaeobiology developments in biomolecular archaeology resource exploitation archaeological prospection conservation science in the archaeological context and statistical and computer applications The contributors who are all well known in their own areas of expertise bring together in each chapter the basic science and the relevance of this science to the overall goal of archaeology understanding humans in the past This book is an invaluable source of reference for those interested in archaeology anthropology quaternary studies geography palaeoecology computing biology chemistry and physics those involved in commercial and local authority field archaeology units museums and archaeological organisations Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur ,2003
