Angels Of Death Exploring The Euthanasia Underground:

Angels of Death Roger S. Magnusson, 2013-05-09 Public discussion of euthanasia and assisted suicide is growing in Australia as elsewhere the debate is difficult, contentious and confronting and hampered by the secrecy that necessarily surrounds illegal practice. Most people simply have no way of knowing how and how often medically assisted death actually occurs. Roger Magnusson presents for the first time detailed first-hand accounts by doctors, nurses, therapists and other health professionals who have been participants in assisted death. All have been intimately involved in caring for people with AIDS both in Australia and in California. He places these ambivalent, self-incriminating accounts within the broader context of the right to die debate and the challenges of palliative care. The frankness of the health workers and the richness of their collected evidence set this book apart. From within a culture of deception they speak knowingly and movingly of the merciful release of a peaceful death while acknowledging the reality of botched attempts, euthanasia without consent, precipitative euthanasia, lack of accountability and professional distance and many other disturbing issues. **Angels of Death** provides a window into the euthanasia underground, a secret part of medicine and nursing that few professionals will publicly acknowledge. It brings a sense of urgency and precision to public debate and equips us all to think more independently about these crucial issues.

Assisted Dying for the Terminally Ill Bill (HL) Great Britain: Parliament: House of Lords: Select Committee on the Assisted Dying for the Terminally Ill Bill, 2005-04-28 The Bill was published as HLB 4 session 2004-05 ISBN 01084188390 This volume contains a selection of the 14,000 personal letters and other submissions received by the Committee with regards to their inquiry into the Bill.

Dying, Assisted Death and Mourning Asa Kasher, 2009 Dying and death are topics of deep humane concern for many people in a variety of circumstances and contexts. However, they are not discussed to any great extent or with sufficient focus in order to gain knowledge and understanding of their major features and aspects. The present volume is an attempt to bridge the undesirable gap between what should be known and understood about dying and death and what is easily accessible. Included in the present volume are chapters arranged in three sections. First, there are chapters on aspects of dying written by people who have professional experience and personal insights into the nature of the processes at work and the ways it should be treated. Secondly, there are chapters on assisted death, euthanasia that illuminate the practices involved in the professional assistance given to persons who suffer from an incurable illness and who do not want their painful life to be medically extended. Thirdly, there are chapters on mourning examined in a variety of cultural contexts. These provide insights for different ways of maintaining the presence of the dead in the life of the living, life in the hearts.

Making Sense Of: Dying and Death, 2004-01-01 This book aims to extend upon the growing body of literature concerned with dying and death. The book analyses various experiences and representations of dying and death from the perspective of academic disciplines as diverse as theology, philosophy, sociology, anthropology and literature. The rationale for

this is simple As objects of study dying and death cannot be usefully reduced to a single academic perspective One cannot hope to gain a deep and comprehensive understanding of dying and death by gazing at them through a single lens Bringing various perspectives in a single volume aims to both accurately record those enduring properties of the phenomena such as mourning and fear whilst simultaneously analysing the diversity and heterogeneity of human beings attempts to come to terms with this most forbidding of existential horizons

Assisted Death in Europe and America Guenter

Lewy,2010-09-23 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the issues Rosamond Rhodes Director Bioethics Education Mt Sinai School of Medicine
