Anglo-Saxon & Norman Bristol David Sivier,2002 In this book David Sivier explores the city s origins as a royal burh in the eleventh century its connection with the royal manor of Barton Regis and the establishment of a judicial centre under a reeve He also looks at the location and construction of the burh defences and of the Norman town walls and castles and describes the Norman cathedral churches In addition he covers the day to day life of the city from farming and industry to the construction of the city docks

The Archaeology of the 11th Century Dawn M Hadley,Christopher Dyer,2017-02-10 The Archaeology of the 11th Century explores this formative period of English history and in particular the impact of the Conquest of England by the Normans The volume examines how the Normans contributed to local culture religion and society through a range of topics including food culture funerary practices the development of castles and their impact and how both urban and rural life evolved during the eleventh century Through its nuanced approach to the complex relationships and regional identities which characterized the period this collection stimulates renewed debate and challenges some of the long standing myths surrounding the Conquest

Reversing Babel Bruce R. O'Brien,2011-04-01 Reversing Babel Translation among the English during an Age of Conquests c 800 to c 1200 starts with a small puzzle Why did the Normans translate English law the law of the people they had conquered from Old English into Latin Solving this puzzle meant asking questions about what medieval writers thought about language and translation what created the need and desire to translate and how translators went about the work These are the questions Reversing Babel attempts to answer by providing evidence that comes from the world in which not just Norman translators of law but any translators of any texts regardless of languages did their translating Reversing Babel reaches back from 1066 to the translation work done in an earlier conquest a handful of important works translated in the ninth century in response to the alleged devastating effect of the Viking invasions and carries the analysis up to the wave of Anglo French translations created in the late twelfth century when England was a part of a large empire ruled by a king from Anjou who held power not only in western France from Normandy in the north to the Pyrenees in the south but also in Ireland Scotland and Wales In this longer and wider view the impact of political events on acts of translation is more easily weighed against the impact of other factors such as geography travel trade community trends in learning ideas about language and habits of translation These factors colored the contact situations created in England between speakers and readers of different languages during perhaps the most politically unstable period in English history The variety of medieval translation among the English and among those translators working in the greater empires of Cnut the Normans and the Angevins is remarkable Reversing Babel does not try to describe all of it rather it charts a course through the evidence and tries to answer the fundamental questions medieval historians should ask when their sources are

Property, Power and the Growth of Towns Catherine Casson,Mark Casson,2023-05-05 Local enterprise institutional quality and strategic location were of central importance in the growth of medieval towns This book comprising a study of 112 English towns emphasises these key factors Downstream locations on major rivers attracted international trade and thereby stimulated the local processing of imports and exports while the early establishment of richly endowed religious institutions funnelled agricultural rental income into a town where it was spent on luxury goods produced by local craftsmen and artisans and on expensive long running building schemes Local entrepreneurs who recognised the economic potential of a town developed residential suburbs which attracted wealthy residents Meanwhile town authorities invested in the building and maintenance of bridges gates walls and ditches often with financial support from wealthy residents Royal lordship was also an advantage to a town as it gave the town authorities direct access to the king and bypassed local power brokers such as bishops and earls The legacy of medieval investment remains visible today in the streets of important towns Drawing on rentals deeds and surveys this book also examines in detail the topography of seven key medieval towns Bristol Gloucester Coventry Cambridge Birmingham Shrewsbury and Hull In each case surviving records identify the location and value of urban properties and their owners and tenants Using statistical techniques previously applied only to the early modern and modern periods the book analyses the impact of location and type of property on property values It shows that features of the modern property market including spatial autocorrelation were present in the middle ages Property hot spots of high rents are also identified the most valuable properties were those situated between the market and other focal points such transport hubs and religious centres convenient for both but remote from noise and pollution This book takes an interdisciplinary approach drawing on expertise from the disciplines of economics and history It will be of interest to historians and to social scientists looking for a long run perspective on urban development *Bristol Past and Present: Civil history [by Nicholls*
