Animal Rights Controversy:

Hearts and Minds Julian McAllister Groves, 1997 Living in a university town that is a center of biomedical research Groves found he could not ignore the intense opposition to research using animals He began to analyze the formation and activities of local protest groups attending meetings and talking to activists about their beliefs To his surprise many activists emphasized rational and scientific justifications for their commitment to the movement Conversely scientists frequently discussed their use of lab animals in the context of their attachment to pets or other animals and their concern for the environment Groves seeks to understand these positions in connection with popular beliefs about the place of emotions in public life Hearts and Minds looks past the placards and sound bites to people's intellectual and psychological explanations for their positions It discards worn generalizations and offers a nuanced portrait of people who are seriously engaged in reconciling their ethics and their behavior

Ethical and Moral Issues Relating to Animals John Timothy Allen, 1993

Animal Cruelty and Freedom of Speech Abigail Perdue, Randall Lockwood, 2014-05-15 A collaboration between an attorney and an animal protection advocate this work utilizes the extremely controversial and high profile crush video case US v Stevens to explore how American society attempts to balance the protection of free speech and the prevention of animal cruelty Starting from the detailed case study of a single prominent ruling the authors provide a masterful survey of important issues facing society in the area of animal welfare The Stevens case included various hot topic elements connected to the role of government as arbiter of public morality including judicial attitudes to sexual deviance and dogfighting Because it is one of only two animal rights cases that the US Supreme Court has handled and the only case discussing the competing interests of free speech and animal cruelty it will be an important topic for discussion in constitutional and animal law courses for decades to come The Stevens case arose from the first conviction under 18 USC 48 Section 48 a federal law enacted in 1999 which criminalized

the creation and possession of certain depictions of animal cruelty The US Congress intended Section 48 to end the creation and interstate trafficking of depictions of animal cruelty in which animals are abused or even killed for entertainment's sake Proponents of Section 48 predicted that countless benefits to both humans and animals would flow from its enforcement Opponents of the law argued that it was too far reaching and would stifle protected speech Critics of Section 48 appeared to have prevailed when the US Supreme Court struck the law down as unconstitutionally overbroad Although a law tailored to address the Supreme Court's concerns was quickly enacted the free speech animal cruelty controversy is far from over

[Killing Tradition](#) Simon J. Bronner, 2008-11-21 Across the country and around the world people avidly engage in the cultural practice of hunting Children are taken on rite of passage hunting trips where relationships are cemented and legacies are passed on from one generation to another Meals are prepared from hunted game often consisting of regionally specific dishes that reflect a community's heritage and character Deer antlers and bear skins are hung on living room walls decorations and relics of a hunter's most impressive kills Only 5 percent of Americans are hunters but that group has a substantial presence in the cultural consciousness Hunting has spurred controversy in recent years inciting protest from animal rights activists and lobbying from anti cruelty demonstrators who denounce the custom But hunters have responded to such criticisms and the resulting legislative censures with a significant argument in their defense the claim that their practices are inextricably connected to a cultural tradition Further they counter that they as representatives of the rural lifestyle pioneer heritage and traditional American values are the ones being victimized Simon J Bronner investigates this debate in [Killing Tradition Inside Hunting and Animal Rights Controversies](#) Through extensive research and fieldwork Bronner takes on the many questions raised by this problematic subject Does hunting promote violence toward humans as well as animals Is it an outdated activity unnecessary in modern times Is the heritage of hunting worth preserving [Killing Tradition](#) looks at three case studies that are at the heart of today's hunting debate Bronner first examines the allegedly barbaric rituals that take place at deer camps every late November in rural America He then analyzes the annual Labor Day pigeon shoot of Hegins Pennsylvania which brings animal rights protests to a fever pitch Noting that these aren't simply American concerns and that the animal rights movement in America is linked to British animal welfare protests Bronner examines the rancor surrounding the passage of Great Britain's Hunting Act of 2004 the most comprehensive and divisive anti hunting legislation ever enacted The practice of hunting is sure to remain controversial as it continues to be touted and defended by its supporters and condemned and opposed by its detractors With [Killing Tradition](#) Bronner reflects on the social psychological and anthropological issues of the debate reevaluating notions of violence cruelty abuse and tradition as they have been constructed and contested in the twenty first century

 Women and the Animal Rights Movement Emily Gaarder,2011-02-19 Animal rights is one of the fastest growing social movements today Women greatly outnumber men as activists yet surprisingly little has been written about the importance and impact of gender on the movement Women and the Animal Rights Movement combats stereotypes of women activists as mere sentimentalists by exploring the political and moral character of their advocacy on behalf of animals Emily Gaarder analyzes the politics of gender in the movement incorporating in depth interviews with women and participant observation of animal rights organizations conferences and protests to describe struggles over divisions of labor and leadership Controversies over PETA advertising campaigns that rely on women s sexuality to sell animal rights illustrate how female crusaders are asked to prioritize the cause of animals above all else Gaarder underscores the importance of a paradigm shift in the animal liberation movement one that seeks a more integrated vision of animal rights that connects universally to other issues gender race economics and the environment highlighting that many women activists recognize and are motivated by the connection between the oppression of animals and other social injustices **Animals' rights, considered in relation to social progress.
