Fay Edwards, 2018-05-10 Philosophical controversy over non human animals extends further back than many realize before Utilitarianism and Darwinism to the very genesis of philosophy This volume examines the richness and complexity of that long history Twelve essays trace the significance of animals from Greek and Indian antiquity through the Islamic and Latin medieval traditions to Renaissance and early modern thought ending with contemporary notions about animals Two main questions emerge throughout the volume what capacities can be ascribed to animals and how should we treat them Notoriously ungenerous attitudes towards animals mental lives and ethics status found for instance in Aristotle and Descartes are shown to have been more nuanced than often supposed while remarkable defenses of benevolence towards animals are unearthed in late antiquity India the Islamic world and Kant Other chapters examine cannibalism and vegetarianism in Renaissance thought and the scientific testing of animals A series of interdisciplinary reflections sheds further light on human attitudes towards animals looking at their depiction in visual artworks from China Africa and Europe as well as the rich tradition of animal fables beginning with Aesop *The Booklist* ,1967 **Contemporary Scientific Psychology** Albert R. Gilgen, 2013-10-22 Contemporary Scientific Psychology is a compendium of papers dealing with the scientific method in action in psychology The first two papers introduce the paradigm progress and problems found in scientific psychology as well as the observation discovery and confirmation used in theory building including fallacies pertaining to theory construction Other papers deal with research areas such as the neurobehavioral foundations of the biology of mind This research area includes the mechanism specific approaches in behavior genetics particularly the genetic effect as such effect is considered dependent on the mechanisms altered by the environment or the genetic equivalent of a stimuli Another paper discusses comparative psychology in studies involving animal behavior while another author tackles the significant trends in the field of developmental psychology especially as this relates to the early learning processes of humans This book can be helpful for students and teachers in courses related to experimental psychology psychological theories philosophy of science and other academicians and professionals who are interested in general psychology
