Animal societies and evolution Scientific American, **Animal Societies and Evolution** Howard R. Topoff, 1981 Animal communication Evolution of behaviour Social spiders Social behaviour of army ants Weaver ants Schooling of fishes Dolphins Social ecology of coyotes Imprinting in the laboratory Social behaviour of baboons Jackal _____ **The Evolution of Animal Societies** Andres Eduardo Quiñones Paredes, 2016 **Microbial Drivers of Sociality - from Multicellularity to Animal Societies** Dino McMahon, Peter H. W. Biedermann, Marko Rohlf, Joël Meunier, 2021-10-13 **Survival Strategies** Raghavendra Gadagkar, 2001-05-15 Only in recent years have biologists and ethologists begun to apply careful evolutionary thinking to the study of animal societies and with spectacular results This book presents the choicest of these findings illustrated with both photographs and explanatory diagrams **The Evolution of Culture in Animals** John Tyler Bonner, 1980 Animals do have culture maintains this delightfully illustrated and provocative book which cites a number of fascinating instances of animal communication and learning John Bonner traces the origins of culture back to the early biological evolution of animals and provides examples of five categories of behavior leading to nonhuman culture physical dexterity relations with other species auditory communication within a species geographic locations and inventions or innovations Defining culture as the transmission of information by behavioral rather than genetical means he demonstrates the continuum between the traits we find in animals and those we often consider uniquely human *Science and Faith* Paul Topinard, 1899 *Mammal Societies* Tim Clutton-Brock, 2016-05-31 The book aims to integrate our understanding of mammalian societies into a novel synthesis that is relevant to behavioural ecologists ecologists and anthropologists It adopts a coherent structure that deals initially with the characteristics and strategies of females before covering those of males cooperative societies and hominid societies It reviews our current understanding both of the structure of societies and of the strategies of individuals it combines coverage of relevant areas of theory with coverage of interspecific comparisons intraspecific comparisons and experiments it explores both evolutionary causes of different traits and their ecological consequences and it integrates research on different groups of mammals with research on primates and humans and attempts to put research on human societies into a broader perspective **The Scientific Monthly** James McKeen Cattell, 1919 **Princeton Lectures** Princeton University, 1920 BULLETIN TOME XXVI, 1961-04-20 TABLE DE MATI
