ARITHMETIC PRIMER FRANK H. HALL, 2018 *The Arithmetic Primer* Frank H. Hall, 1901 **The Arithmetic Primer** Frank H. Hall, 2015-08-05 Excerpt from *The Arithmetic Primer* An Independent Number Book Designed to Precede Any Series of Arithmetics

Note 1 Most pupils on entering school are somewhat familiar with the number idea A majority of children at six years of age can separate from a group four five or six objects Some can count with a good degree of accuracy ten or twelve objects It is therefore unnecessary except in rare cases for the teacher of first grade pupils to spend time in trying to develop the idea of five or six The work suggested in this chapter then is 1 for mothers 2 for teachers of backward pupils and 3 for a review of that with which many of the pupils in all first grades are already familiar

1 Train the child to distinguish one object from two objects Bring one apple Bring two apples Bring two pencils Bring one pencil Hold up one hand Hold up two hands Show me one thumb Show me two thumbs Give May one cherry Give John two cherries Make one mark Make two marks How many horses How many marbles One apple and one apple are _____ One book and one book are _____ One boy and one boy are _____ With two objects in view the attention of the child being directed to them say One and one are _____ Repeat many times using a variety of objects With the objects concealed from view but presumably imaged by the child say One and one are _____ Repeat many times taking care that at first there come into the mind of the child images of two certain objects suggested by the words One and one

Note 2 The care suggested in the foregoing is necessary lest the child shall simply memorize the expression One and one are two without thinking its meaning The attention of the author was once called to a pupil who was able to recite a hundred number statements like Four and four are eight one half of four is two four is one half of eight and who yet had no knowledge of number whatever could not select two or three objects from a group It is a common experience to find pupils in the second and third grades who have memorized number facts without perceiving them About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Excerpt from *First Days in Number* A Primer of Arithmetic One of the first essentials in primary education is the ability of the pupil to talk without restraint and in good language To correlate this phase of development with number work lends interest to the lesson inspires self confidence in the pupil awakens the child mind to the realization of the wonders it is his privilege to explore Number work is one of the means of the primary teacher by which the natural investigating tendency of the child may be turned into channels where he will make discoveries concerning the truths of nature and the inventions of man The pictures throughout the book are not in any way designed to take the place of actual objects Such objects as are attractive and interesting to the pupil are represented They are familiar to him and yet they suggest many avenues of study to the skilful teacher The first few pages are suggestions for conversational work Objects of life have been chosen because the animal kingdom naturally interests the child mind Quadruped biped bird fish and insect are represented The child is easily led to observe study and classify the animals around him He is interested in observing the many kinds belonging to one class and in studying separately and comparatively their forms foods homes habits and usefulness In this work number appeals incidentally to the mind and little need be said in regard to it Page 10 represents the inventions of man The objects suggested should be studied with a purpose of discovering something of their manufacture the material used their parts and their distinctive usefulness About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [The Arithmetic Primer](#) Daniel C.
