Southwestern gardening offers the most comprehensive guide available to landscaping with native plants. Writing simply enough for beginning gardeners while also providing ample information for landscape professionals, she presents over three hundred trees, shrubs, vines, grasses, groundcovers, wildflowers, cacti, and other native plants suited to arid landscapes. The heart of the book lies in the complete descriptions and beautiful color photographs of plants native to the Mojave, Sonoran, and Chihuahuan desert regions of the Southwestern United States and northern Mexico. Mielke characterizes each plant and gives detailed information on its natural habitat, its water, soil, light, temperature, and pruning requirements, and its possible uses in landscape design. In addition, Mielke includes informative discussions of desert ecology, growing instructions for native plants and wildflowers, and how-to ideas for revegetation of disturbed desert areas using native plants. She concludes the book with an extensive list of plants by type, including those that have specific features such as shade or fragrance. She also supplies a list of public gardens that showcase native plants.

The array of native plant material available to the Southwestern gardener is diverse and spectacular, providing seemingly endless opportunities for creative and attractive landscapes.

In *Landscaping with Native Plants of the Southwest* George Oxford Miller provides the definitive guide to choosing the best of the best among the native plants of Arizona and New Mexico. Covering wildflowers, shrubs, trees, vines, groundcovers, and cacti, this comprehensive, richly illustrated book selects the species whose ornamental qualities, growth habit, adaptability, maintenance needs, and beauty add up to the highest landscape value. The illustrations, maps, and charts provide guidelines for species selection and planting, ongoing maintenance, landscape design, and water and energy conservation. In-depth plant profiles describe the habitat requirements for more than 350 native plant species, subspecies, and varieties, with lush photographs illustrating how each plant looks and responds to landscape conditions.
