anniversaries from 1984 1993 **Philip II** Patrick Williams,2017-03-14 Four hundred years after his death Philip II remains one of the most controversial figures in history admired and reviled in equal measure He is a figure of global importance the first ruler on whose territories the sun never set He led Europe in its defence against the seemingly irresistible power of the Ottoman Empire and many of the nations of Western Europe were forged in part by their responses to his ambitions Portugal was conquered and most of Italy was controlled by him while the Low Countries England and France fought long and bitter wars against him Philip proclaimed himself the leader of Catholic Europe but quarrelled incessantly with the popes of the Counter Reformation In consolidating his monarchy in Spain Philip used the arts as a political tool Titian and Palestrina did some of their greatest work for him This new study traces the development of Philip II and of a kingship that lay at the heart of European political religious and cultural evolution It looks in detail at the ministers who worked with this most demanding of kings and at the government that evolved during his reign It deals also with the pressures of a tortured private life and explores the paradox of a man who as a young ruler was deeply prudent but who became extraordinarily aggressive in his old age and who by his successes and failures both of them on an epic scale re shaped the world in which he lived **Essays in Naval History, from Medieval to Modern** N.A.M. Rodger,2023-05-31 The articles collected here two appearing for the first time in English cover a number of topics central to naval history and illustrate the author s contention that this is not only or even chiefly a distinct area of special study but rather a central theme running through the history of England and of the whole British Isles Though the subjects and the styles vary a good deal the studies are linked by a common approach and some common ideas Hence many examine ways in which naval history has formed a key element in such subjects as intellectual religious administrative or medical history and explored the nature and meaning of sea power as a theme At the same time naval history is a technical subject which demands a willingness to understand warships the most complex artefacts and the structure of large and complex organisations Detailed evidence about ships and weapons can build large conclusions for example about late Anglo Saxon government and military organisation or about the nature of warfare at sea in the Renaissance era While mostly written from the British point of view several essays explicitly survey naval developments over a range of countries and even the most narrowly focused are at least implicitly aware of the wider world of war at sea Bulletin ,1991 History ,1991 *The Roman Channel Crossing of A.D. 43* Gerald Grainge,2002 Grainge s dissertation examines recent evidence from maritime archaeology in the Mediterranean and off the coast of Britain to reinterpret the events of AD 43 **Historical Abstracts** ,1994 Vols 17 18 cover 1775 1914 *Arms and Armour* Arms and Armour Society,1986 **Naval War College Review** Naval War College (U.S.),1990 **Naval War College Review** ,1990 The Historian ,1987 Lapham-Richards Luther Samuel Livingston,1905
