Arms Makers Of Colonial America:

Arms Makers of Colonial Amer James B. Whisker,1992 Arms Makers of Colonial America by James B Whisker is a comprehensively documented historical survey of the broad spectrum of arms makers in America who were active before 1783 Complemented by a lengthy introduction and nearly 200 illustrations this extensive listing was derived from original source materials including the archives and public and state papers of the thirteen original colonies tax records Revolutionary War pensions deeds wills and estates and the American Archives With a full citation of the source each biographical entry presents the type of arms production the individual was engaged in the time period and the location The professions represented are many and varied gunsmiths and gunstockers armorers gun barrel makers iron and steel manufacturers brass founders pike and other edged weapon makers and cutlers accoutrements makers gunpowder makers and gunlock makers and locksmiths In each of the earliest settlements in America there was a gunsmith who mended the arms of his neighbors and sharpened their knives and taught them how to use these tools on which they depended for food and protection John Dandy of Maryland ca 1635 is the first person who can be identified as a gunsmith who made guns lock stock and barrel Most of the earliest gunsmiths were armorers that is they repaired cleaned and maintained arms on government contract In early New England each militiaman provided his own gun or the colonial administration provided one for him and charged him for it The maintenance of the gun was the responsibility of the government and thus it has been possible to identify many of the early armorers and gunsmiths through colonial records of their services Militia service was neglected however during the early to mid eighteenth century and when war came public arms were generally in a deplorable state During the French and Indian War many gunsmiths were impressed into service as armorers to restore the neglected arms This exercise proved to be a grand rehearsal for arms production taken on during the Revolution An English observer wrote that the Americans would have little difficulty arming themselves if war came between the mother country and her colonies because there were more than sufficient gunmakers and allied tradesmen to provide 100 000 guns a year Pennsylvania was the center of the arms making trade The home rifle commonly called the Pennsylvania Kentucky Rifle an American modification of the German hunting rifle had been developed in or near Lancaster Pennsylvania in the second quarter of the eighteenth century It was deadly accurate and gave the skilled marksmen of the backwoods a superior sniper weapon The craftsmen of Lancaster Philadelphia and other cities stopped making their civilian arms and concentrated on making militia muskets in the early years of the war for independence By 1780 except on the frontier the supply of imported and domestic militia arms exceeded demand and the tradesmen returned to rifle making The golden age of classic long rifle making followed Arms Makers of Massachusetts, 1610-1900 James B. Whisker, Kevin Spiker,2013 This study is a major reference work dealing in a thorough and complete fashion with every known gunsmith inventor and manufacturer of firearms in Massachusetts from the earliest colonial smith to the industrial entities that flourished in Massachusetts and New

England by the 1900s Original sources including but not limited to town county and local histories Commonwealth and National Archives directories memoirs U S Patent office materials and military procurement memoranda have been utilized to create a complete biographical record Ancillary areas such as locksmiths powder makers and forge masters are also discussed A complete bibliography and index are also included Dr Whisker is the author of Arms Makers of Colonial America and several other specialist studies Lock, Stock, and Barrel Clayton E. Cramer, 2018-02-21 This provocative book debunks the myth that American gun culture was intentionally created by gun makers and demonstrates that gun ownership and use have been a core part of American society since our colonial origins Revisionist historians argue that American gun culture and manufacturing are relatively recent developments They further claim that widespread gun violence was largely absent from early American history because guns of all types and especially handguns were rare before 1848 According to these revisionists American gun culture was the creation of the first mass production gun manufacturers who used clever marketing to sell guns to people who neither wanted nor needed them However as proven in this first scholarly history of gun culture in early America gun ownership and use have in fact been central to American society from its very beginnings Lock Stock and Barrel The Origins of American Gun Culture shows that gunsmithing and gun manufacturing were important parts of the economies of the colonies and the early republic and explains how the American gun industry helped to create our modern world of precision mass production and high wages for workers **Arms Makers of Pennsylvania** James B. Whisker, 1990 A survey with hundreds of illustrations of the arms making industry in Pennsylvania from its beginnings until about 1900 it focuses on the Pennsylvania long Kentucky rifle and identifies the primary schools of gun making and major technological developments Illustrated The Gunning of America Pamela Haag, 2016-04-19 Americans have always loved guns This special bond was forged during the American Revolution and sanctified by the Second Amendment It is because of this exceptional relationship that American civilians are more heavily armed than the citizens of any other nation Or so we are told In The Gunning of America historian Pamela Haag overturns this conventional wisdom American gun culture she argues developed not because the gun was exceptional but precisely because it was not guns proliferated in America because throughout most of the nation s history they were perceived as an unexceptional commodity no different than buttons or typewriters Focusing on the history of the Winchester Repeating Arms Company one of the most iconic arms manufacturers in America Haag challenges many basic assumptions of how and when America became a gun culture Under the leadership of Oliver Winchester and his heirs the company used aggressive sometimes ingenious sales and marketing techniques to create new markets for their product Guns have never sold themselves rather through advertising and innovative distribution campaigns the gun industry did Through the meticulous examination of gun industry archives Haag challenges the myth of a primal bond between Americans and their firearms Over the course of its 150 year history the Winchester Repeating Arms Company sold over 8 million guns But Oliver Winchester a shirtmaker in his previous career had no apparent qualms about a

life spent arming America His daughter in law Sarah Winchester was a different story Legend holds that Sarah was haunted by what she considered a vast blood fortune and became convinced that the ghosts of rifle victims were haunting her She channeled much of her inheritance and her conflicted conscience into a monstrous estate now known as the Winchester Mystery House where she sought refuge from this ever expanding army of phantoms In this provocative and deeply researched work of narrative history Haag fundamentally revises the history of arms in America and in so doing explodes the cliché that have created and sustained our lethal gun culture

Arming America Michael A. Bellesiles, 2000 How and when did Americans develop their obsession with guns Is gun related violence so deeply embedded in American historical experience as to be immutable The accepted answers to these questions are mythology says Michael A Bellesiles Basing his arguments on sound and prodigious research Bellesiles makes it clear that gun ownership was the exception even on the frontier until the age of industrialization In Colonial America the average citizen had virtually no access to or training in the use of firearms and the few guns that did exist were kept under strict control No guns were made in America until after the Revolution and there were few gunsmiths to keep them in repair Bellesiles shows that the U S government almost from its inception worked to arm its citizens but it met only public indifference and resistance until the 1850s when technological advances such as repeating revolvers with self contained bullets contributed to a surge in gun manufacturing Finally we see how the soaring gun production engendered by the Civil War and the decision to allow soldiers to keep their weapons at the end of the conflict transformed the gun from a seldom needed tool to a perceived necessity opposing ideas that are still at the center of the fight for and against gun control today Michael A Bellesiles s research set off a chain of passionate reaction after its publication in the *Journal of American History* in 1996 and *Arming America* is certain to be one of the most controversial and widely read books on the subject From the Hardcover edition

American Rifle Alexander Rose, 2009-09-29 George Washington insisted that his portrait be painted with one Daniel Boone created a legend with one Abraham Lincoln shot them on the White House lawn And Teddy Roosevelt had his specially customized In this first of its kind book historian Alexander Rose delivers a colorful engrossing biography of an American icon the rifle Drawing on the words of foot soldiers inventors and presidents based on extensive new research and spanning from the Revolution to the present day *American Rifle* is a balanced wonderfully entertaining history of the rifle and its place in American culture
