Arms Race:

The Control of the Arms Race Hedley Bull, 1961 **The Political Economy of the Arms Race** R.T.

Maddock, 1990-06-18 Written by the author of *The Political Economy of Soviet Defence Spending* and co author of *The Growth of the British Economy* this book looks at the international dimension the American and the Soviet defence economy the NATO alliance the Warsaw Pact and the international arms trade *The Arms Race* Anita Croy, 2019-07-15 Arms races are often associated with the Cold War but they re still a reality around the world today Issues such as military aggression and nuclear weapons are complex but they re presented to readers in an accessible way A fact filled main text engaging full color photographs and helpful graphic organizers richly present details about the arms race Readers are challenged to think for themselves about international arms races as they explore discussion questions and are asked to compare and contrast the viewpoints of experts Although news stories about weapons and wars might seem frightening to young people this volume stresses the importance of facts over fearmongering [The Arms Race in Asia](#) Andrew T.H. Tan, 2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments *The Arms Race in Asia* concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general **Arms Races in International Politics** Thomas Mahnken, Joseph Maiolo, David Stevenson, 2016-01-14 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics drawing both on theoretical approaches and on the latest historical research Written by an international team of specialists it is divided into four sections before 1914 the inter war years the Cold War and extra European and post Cold War arms races Twelve case studies examine land and naval armaments before the First World War air land and naval competition during the 1920s and 1930s and nuclear as well as conventional weapons since 1945 Armaments policies are

placed within the context of technological development international politics and diplomacy and social politics and economics An extended general introduction and conclusion and introductions to each section provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists Arms Races in International Politics addresses two key questions what causes arms races and what is the connection between arms races and the outbreak of wars

Secrecy and the Arms Race Martin C. McGuire,1965 Martin McGuire has written for the specialist and the concerned layman a highly original and valuable contribution to our understanding of the arms race based upon economic theory in general and the theory of economic duopoly in particular He calls attention to the fact that when two world powers face each other with massive allocations of resources for arms and when each regards the other as the major if not the sole threat to its own security the question of accurate information about the strength and intentions of the adversary arises for each side in many and various ways As a result this study is a pioneering analytic effort to approach the value of keeping secrets from or of obtaining information about an enemy The author is concerned with such questions as what is the loss in being only 50 percent confident rather than certain that the adversary doesn't have more X missiles or missiles of yield W megatons or of accuracy C thousand feet Should one insist on being 95 percent sure when bargaining for arms control How can a side compensate for its uncertainty most efficiently An understanding of these problems can not only increase our security it may help as well to contain or control the entire two sided race

Tacit Bargaining, Arms Races, and Arms Control George W. Downs,David M. Roache,2025-10-01 When most people including social scientists reflect on the ways that nations resolve their differences they tend to think in terms of polar alternatives war versus negotiation This perspective ignores a third path tacit bargaining which is applicable as this book shows to a wide variety of international issues and is especially germane to the problem of treaty maintenance

Arms Race Theory Craig Etcheson,1989 For most of the twentieth century social scientists have attempted to understand the causes of military competition From this struggle has evolved the Richardson Tradition of Arms Race Analysis a distinct body of scientific literature that uses a variety of mathematical techniques and theoretical ideas to solve the puzzle of what drives military interaction among nations Etcheson explores this intellectual journey and projects the paths along which the Richardson Tradition must go if it is to obtain its objective understanding and control of potentially unnecessary organized social violence Arms Race Theory examines thoroughly the literature of the Richardson Tradition from the writings of Lewis Fry Richardson through the most recent attempts of his students to resolve the fundamental questions about interaction in arms races Etcheson documents the application of the procedures of positive physical science to social problems and identifies the reasons why Richardson and his students have been frustrated in their efforts According to the author students of the Richardson Tradition adhere to an atomistic and reductionist perspective that denies the relevance of human values and intentions He focuses on the idea of strategy as a gateway to an understanding of the social causes of arms accumulation Etcheson prepares the way for a new phase in the Richardson Tradition by identifying new theoretical foci and methodological techniques His analysis coupled with the most comprehensive bibliography of the literature of the Richardson Tradition currently available is a significant contribution to the growing body of scholarship in peace research and international relations theory
