Arnold Toynbee Eke Ecumenical Vision:

Arnold Toynbee: the Ecumenical Vision Kenneth Winetrout, 1975 *Occidentalism* Xiaomei Chen, 1995-09-07 Xiaomei Chen offers an insightful account of the unremittingly favorable depiction of Western culture and its negative characterization of Chinese culture in post Mao China from 1978-1988. Chen examines the cultural and political interrelations between the East and West from a vantage point more complex than that accommodated by most current theories of Western imperialism and colonialism. Going beyond Edward Said's construction in *Orientalism* of cross-cultural appropriations as a defining facet of Western imperialism, Chen argues that the appropriation of Western discourse, what she calls *Occidentalism*, can have a politically and ideologically liberating effect on contemporary non-Western culture. Using China as a focus of her analysis, Chen examines a variety of cultural media from Shakespearean drama to Western modernist poetry to contemporary Chinese television. She thus places sinology in the general context of Western theoretical discourses such as Eurocentrism, postcolonialism, nationalism, modernism, feminism, and literary hermeneutics, showing that it has a vital role to play in the study of Orient and Occident and their now unavoidable symbiotic relationship. *Occidentalism* presents a new model of comparative literary and cultural studies that reenvision cross-cultural appropriation.

Fifty Key Thinkers on History Marnie Hughes-Warrington, 2007-10-31 *Fifty Key Thinkers on History* is a superb guide to historiography through the ages. The cross-section of debates and thinkers covered is unique in its breadth, taking in figures from ancient China, Greece, and Rome through the Middle Ages to contemporary Europe, America, Africa, and Australia, from Bede to Braudel, Marx to Michelet, Ranke to Rowbotham, Foucault to Fukuyama. Each clear and concise essay offers biographical information, a summary and discussion of the subject's approach to history, and how others have engaged with it, a list of their major works, and a guide to diverse resources for further study, including books, articles, films, and websites.

The Encyclopedia of the Industrial Revolution in World History Kenneth E. Hendrickson III, 2014-11-25 As editor, Kenneth E. Hendrickson III notes in his introduction: "Since the end of the nineteenth century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan. In *The Encyclopedia of the Industrial Revolution in World History*, contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. *The Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu. Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men, and

women families and organizations They also cover legal developments disasters and the environmental impact of the Industrial Revolution Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information The Encyclopedia of the Industrial Revolution in World History includes over 300 illustrations as well as artfully selected extended quotations from key primary sources from Thomas Malthus Essay on the Principal of Population to Arthur Young s look at Birmingham England in 1791 This work is the perfect reference work for anyone conducting research in the areas of technology business economics and history on a world historical scale
