Medicinal and Aromatic Plants Gopal Shukla, Bidhan Roy, Sumit Chakravarty, 2020-06-10 Medicinal and aromatic plants MAPs are invaluable natural resources of use to human race without which the survival of human animal race is incredible There is an enormous diversity of plants which are put into medicinal beauty care and culinary purposes Cultivation of commercially important medicinal plants is in high demand as the global community is growing towards a green and herbal oriented approach India as a country has thousands of years old traditional medicinal systems which rely solely on medicinal plants There is a gradual loss of medicinal plants with the increasing demand of plant derived drugs Majority of medicinal plants are still collected from the wild This doesn't meet the demand and thereby pave ways to adulterants The over extraction and ignorant activities cause biodiversity loss Farm production of MAPs in these days is extremely vulnerable to underlying climate risk Sustainable management of these resources requires urgent attention for environmental stability and improvement of livelihood New income generating opportunities are opening up for rural populations and in particular for small scale farmers as well as marginal farmers through MAPs cultivation New generation are not well aware of the various uses of many plants to which it was put before Thus there is an urgent need to spread the knowledge and conserve the wild populations of medicinal plant diversity in various forest areas of India Considering the importance of the MAPs an attempt was taken in this edited book to understand and highlight the role of MAPs in livelihood improvement and income generation through cultivation conservation and utilisation Most of the chapters in this book dealt with individual medicinal plants in detail Two chapters have also been included on pests and diseases management of MAPs Nowadays IPR issues are more important One chapter has been included on IPR issues on medicinal plants A chapter also devoted on value addition of the medicinal plant products

Breeding Research on Aromatic and Medicinal Plants Christopher B Johnson, Chlodwig Franz, 2024-11-01 The field of medicinal aromatic plant breeding is growing and changing this resource will help you stay up to date In this essential book researchers from large and small laboratories and institutions throughout Europe and the Mediterranean region explore recent developments in the selection and breeding of aromatic and medicinal plants They take varied approaches from traditional breeding to the use of molecular markers and complement them with up to date information on biodiversity and resource conservation From the editors It is widely recognized that a strategy of conservation through use by which plant collection via wild harvesting is replaced by controlled cultivation is the best way forward if we are to balance human demands with the necessary conservation of the biodiversity represented by these species That provides one major driving force for research in this field Another concerns the very real need for improving the quality control of products on the market both to satisfy consumer demand and to conform with the justifiably increasing requirements for standardization and precise identification of the composition of the plant materials

being sold for human use We hope that this volume will give readers a taste of the exciting developments in the field Breeding Research on Aromatic and Medicinal Plants examines breeding for resistance and abiotic factors manipulating natural product accumulation through genetic engineering biochemical and molecular regulation of essential oil accumulation economic and legal considerations that breeders will encounter the ethical aspects of breeding these plants
