Husserl's late phenomenology The author claims that Husserl's meta phenomenological exploration of the theoretical and importantly practical underpinnings of the transcendental investigator leads him to affirm their humanity and ultimately to adopt an ethically charged ideal of higher humanity as telos of phenomenology Fink argued that phenomenology was essentially an activity beyond the horizon of human possibility and history In contrast Dani illustrates how Husserl was looking for a way to theoretically unite the purity of transcendental insight with the existential reality and practical motives of the phenomenologist Understanding the complex aspects of this debate is crucial for understanding the Crisis period of Husserl's thought This text appeals to graduate students and researchers in phenomenology and related fields of philosophy
