Art And Architecture:

Warped Space Anthony Vidler, 2002-02-22 How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century Beginning with agoraphobia and claustrophobia in the late nineteenth century followed by shell shock and panic fear after World War I phobias and anxiety came to be seen as the mental condition of modern life They became incorporated into the media and arts in particular the spatial arts of architecture urbanism and film This spatial warping is now being reshaped by digitalization and virtual reality Anthony Vidler is concerned with two forms of warped space The first a psychological space is the repository of neuroses and phobias This space is not empty but full of disturbing forms including those of architecture and the city The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth century theories of spatial alienation and estrangement in the writings of Georg Simmel Siegfried Kracauer and Walter Benjamin Focusing on current conditions of displacement and placelessness he examines ways in which contemporary artists and architects have produced new forms of spatial warping The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci Mike Kelley Martha Rosler and Rachel Whiteread Finally Vidler looks at the architectural experiments of Frank Gehry Coop Himmelblau Daniel Libeskind Greg Lynn Morphosis and Eric Owen Moss in the light of new digital techniques that while relying on traditional perspective have radically transformed the composition production and experience perhaps even the subject itself of architecture *Experiencing Art and Architecture* Sanda

Foster, 2013-07-02 Hal Foster author of the acclaimed *Design and Crime* argues that a fusion of architecture and art is a defining feature of contemporary culture He identifies a global style of architecture as practiced by Norman Foster Richard Rogers and Renzo Piano analogous to the international style of Le Corbusier Gropius and Mies More than any art today s

global style conveys both the dreams and delusions of modernity Foster demonstrates that a study of the art architecture complex provides invaluable insight into broader social and economic trajectories in urgent need of analysis *The Oxford Dictionary of Christian Art & Architecture* Peter Murray, Linda Murray, 2014 This edition originally published 2013

Out of the Ordinary is one part unembellished documentation and one part verbi visual equivalent of a Pro Hart work made with nineteenth century paint loaded canons It is a cultural history resource for contemporary designers imaginarium and luminous almanac of an explorer of the stranger species of creativity from brick art to letterboxes junk mail mail art television fashion food model trains Disney s imagineering amusement parks feng shui Postmodern architecture human scale craftsmanship forgotten Australian architects in China famous architects that perhaps should be forgotten save for their bow ties collectors of Sherlock Holmes memorabilia outsider artists and clients and none of these things exactly Everywhere Derham Groves attends to and finds significance in the minutiae of everyday life inter association and those things that affect us so profoundly but remain just outside the purview of the normal And in these things objects art architecture environment s he finds stories and teaches his reader how to do the same Out of the Ordinary is also a motivational text It begins with bricks perhaps the most standardized and repeatable units of construction and reveals how they can be used as vehicles for unfettered creativity and not merely for the creation of containers Groves shows how art and architecture can emerge and receive nourishment from the garbage of the everyday and creative collisions Groves also calls albeit subtly for a turn away from homogeneity the standardized and unimaginative or lazy design informed by principles of economy efficiency utility and function conceived in abstraction Rather Groves celebrates the reanimation and or rejuvenation of place by the makers of anything out of the ordinary who don t necessarily pray to the demiurge of good taste who have created spaces and things through which the creative imagination shines Dr Andrew Chrystall School of Communication Journalism and Marketing Massey University

[Gordon Matta-Clark](#) Stephen Walker, 2011-05-10 Known for and even overshadowed by his brutal and spectacular building cuts Gordon Matta Clark s oeuvre is unique in the history of American art He worked in the 1970s on the borders between art and architecture and his diverse practice is often understood as an outright rejection of the tenets of high modernism Stephen Walker argues instead for the artist s ambivalent relationship with the architectural heritage he is often claimed to disavow thus making this the first book to extrapolate Matta Clark s thinking beyond its immediate context Walker considers the broad range of Matta Clark s ephemeral practice from montage to actual interventions and from performance art and installation to drawing film and video Bringing to the fore the consistent themes and issues explored through this broad range of media and in particular the complex notion of the discreet violation he reveals the continued relevance of Matta Clark s artistic and theoretical oeuvre to the reception of artistic and architectural work today

Mischief Christian Bjone, The Images Publishing Group, 2014-04-04 In the world of modern art the idea of appropriation or the conscious manipulation of the recognised world of another artist has long been accepted as a legitimate strategy in criticism of the tradition of art authorship challenging the context of viewing contemporary work and the manipulation of omnipresent media images The world of art itself is fair game to be pillaged or mined in the production of new art but there is almost no recognised equivalent aesthetic in architecture Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career A singular taste maker Philip Johnson influenced art architecture and design during the second half of the 20th century Philip Johnson and His Mischief Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson s style was influenced first by his mentor Mies van der Rohe and then by post modern ideas and artists This title serves to review Johnson s body of work and show that far from being a weakness his use of appropriation was a major part of his innovative success

s preoccupation with the human body and the ban on the representation of the human body in Islam has meant that Islamic and Western art have been perceived as inherently at odds. However, the move away from this anthropomorphic aesthetic in Western art movements such as modern abstract and constructivist painting have presented the opportunity for new ways of viewing and evaluating Islamic art and architecture. This book questions the very idea of art predicated on the anthropocentric bias of classical art and the corollary exclusion of Islamic art from the status of art. It addresses a central question in post-classical aesthetic theory in as much as the advent of modern abstract and constructivist painting have shown that art can be other than the representation of the human body: that art is not neutral aesthetic contemplation but it is fraught with power and violence and that the presupposition of classical art was not a universal truth but the assumption of a specific cultural and historical set of practices and vocabularies. Based on close readings of classical Islamic literature, philosophy, poetry, medicine, and theology along with contemporary Western art theory, the author uncovers a specific Islamic theoretical vision of art and architecture based on poetic practice, politics, cosmology, and desire. In particular, it traces the effects of decoration and architectural planning on the human soul as well as the centrality of the gaze in this poetic view in Arabic nazar while examining its surprising similarity to modern theories of the gaze. Through this double gesture moving critically between two traditions, the author brings Islamic thought and aesthetics back into the realm of visibility, addressing the lack of recognition in comparison with other historical periods and traditions. This is an important step toward a critical analysis of the contemporary debate around the revival of Islamic architectural identity, a debate intricately embedded within opposing Islamic political and social projects throughout the world.

Art Nouveau Charlotte Ashby, 2021-10-21 Art Nouveau presents a new overview of the international Art Nouveau movement. Art Nouveau represented the search for a new style for a new age, a sense that the conditions of modernity called for fundamentally new means of expression. Art Nouveau emerged in a world transformed by industrialisation, urbanisation, and increasingly rapid means of transnational exchange, bringing about new ways of living, working, and creating. This book is structured around key themes for understanding the contexts behind Art Nouveau, including new materials and technologies, colonialism and imperialism, the rise of the modern woman, the rise of the professional designer, and the role of the patron/collector. It also explores the new ideas that inspired Art Nouveau: nature and the natural sciences, world arts and world religions, psychology, and new visions for the modern self. Ashby explores the movement through 41 case studies of artists and designers, buildings, interiors, paintings, graphic arts, glass, ceramics, and jewellery drawn from a wide range of countries.
