Art And Human Consciousness:

Art and Human Consciousness Gottfried Richter, 1985 This survey of western art from ancient Egypt to Picasso looks at visual art in a completely new and imaginative way Gottfried Richter's lively and penetrating observations will inspire and enthuse the novice while breathing new life into the thinking of art critics and historians Richter concerns himself broadly with architecture sculpture and painting as well as mythology and legend in presenting the creations of artist and architect as an expression of the evolution of human consciousness In vivid images he offers the reader interpretive keys to understand this process in all areas of art history With many examples the author illustrates how human life has undergone a qualitative transformation as humanity has gradually freed itself from a life determined by spiritual guidance in order to take hold of the sensory world and experience free individuality
