Dust Disappears:

Kundalini Science Premyogi vajra, 2026-02-22 There is a moment on the inner path when seeking itself begins to feel unnecessary Not because understanding is complete but because life has quietly taken over where effort can no longer help Kundalini Science A Spiritual Psychology is a complete six book series that explores this movement with clarity restraint and lived insight It does not attempt to impress promise awakening or present spiritual techniques Instead it observes how Kundalini unfolds naturally within human consciousness and how the mind identity and daily life reorganize around that unfolding Kundalini is often surrounded by mystery exaggeration or fear Some describe it as a supernatural power others as a dangerous disturbance This series moves beyond both extremes It looks at Kundalini as an experiential and psychological process that can be understood without myth drama or belief What matters here is not what Kundalini is supposed to be but how it is actually lived Written over several years these six books follow the natural arc of the journey They begin with the awakening of inner energy and continue through confusion fascination with states psychological shifts and gradual correction As the series progresses attention moves away from experiences and toward integration Language becomes simpler The need to explain everything slowly dissolves These writings originated as short reflections written close to experience rather than after it was intellectualized Each book preserves that immediacy Read together they form a continuous narrative that mirrors the way this path often unfolds for sincere practitioners not in a straight line but through observation adjustment and maturity This is not a guidebook or a manual There are no instructions to follow and no milestones to chase The series offers orientation rather than direction It helps readers recognize what is happening when inner change begins and understand why certain phases feel confusing intense or unexpectedly quiet By the final volume the focus naturally shifts beyond Kundalini itself What remains is not another experience to attain but a simpler way of living with greater clarity balance and ease The journey does not conclude with answers but with space This complete six book series is written for readers who are already encountering inner transformation and are seeking understanding rather than stimulation It speaks to those who value grounded insight over spiritual display integration over fascination and lived clarity over concepts Kundalini Science A Spiritual Psychology does not claim to explain everything It explains enough to steady the path dissolve confusion and allow life itself to become the teacher

rather than avoidance Journey into the realm of Kundalini Yoga Meditation and awaken the serpent coiled at the base of the spine Through breath mantra and movement dormant energies ascend chakras awaken and consciousness expands This alchemical fusion of body breath and spirit ignites the fire within propelling towards enlightenment and the bridging of earthly and divine realms When the paths of Vipassana and Kundalini intersect a symphony of awakening ensues Insights flow forth wisdom cascades and a harmonious fusion of equanimity and fervor takes shape Through firsthand accounts of seekers witness their struggles revelations and the luminous moments where Vipassana and Kundalini intertwine offering a glimpse into the profound yin and yang of enlightenment Harmony Within beckons seasoned meditators and curious novices alike to explore the alchemical dance of two venerable traditions Embrace the serenity awaken the serpent within and unlock the mysteries that lie at the convergence of Vipassana and Kundalini in this captivating journey of self discovery and transformation All chapters in this book were originally part of our earlier work Kundalini Science series Spiritual Psychology books If you enjoyed these you ll find more in the full compilation [KUNDALINI ESSENTIALS](#) Premyogi vajra,2026-02-22

Sometimes the deepest changes do not announce themselves with drama They arrive quietly as clarity as a subtle shift in how life is felt and understood A moment when something within begins to move not outward but inward and upward asking to be recognized rather than controlled Kundalini Essentials is a collected work that explores this inner movement through direct experience and thoughtful reflection Rather than presenting Kundalini as a mysterious force or an extreme spiritual event this boxed set approaches awakening as a natural human process that unfolds through awareness balance and understanding This collection brings together four complete works that examine Kundalini and inner awakening from multiple perspectives Practical observations lived experiences and clear inquiry guide the reader through the dynamics of inner energy meditation Vipassana insight Tantra and non dual awareness Each book stands on its own yet together they form a coherent and grounded exploration of consciousness in motion The writings do not rely on belief ritual or borrowed philosophy They arise from periods of active inner awakening real interactions with seekers and years of observation and integration Emphasis is placed on psychological stability ethical clarity and everyday grounding making the material accessible without diluting its depth Kundalini is presented here not as something to force or fear but as an intelligent inner movement that responds to clarity and presence Vipassana offers insight and equanimity Kundalini brings vitality and transformation and non dual awareness reveals the underlying unity in which both arise Together they illuminate a path that is neither escapist nor indulgent but deeply rooted in lived reality This boxed set does not promise instant enlightenment supernatural powers or permanent bliss What it offers instead is the ability to understand what is happening within you why inner states change why energy intensifies or settles and how awareness can mature without imbalance or confusion Kundalini Essentials is intended for sincere readers interested in inner energy meditation spiritual psychology and the nature of consciousness Whether you are already walking a contemplative path or simply questioning the deeper dimensions of

experience these writings invite you to look directly at your own inner life with honesty and patience This is not a system to follow or a belief to adopt It is a companion for recognition When understanding deepens the book naturally fades into the background and the movement it points to continues on its own Kundalini Essentials is not about becoming something new It is about recognizing what has always been quietly present within you

Harmonizing the Hundred Teachings Yi Neunghwa, The Baekgyo hoetong originally authored by Yi Neunghwa in 1912 is a book of comparative religion written from a Buddhist point of view As the first book authored by Yi a prominent Buddhist scholar and one of the top three researchers of Korean folk culture during modern times the Baekgyo hoetong is a significant work in the history of academic endeavors on Korean culture and Korean Buddhism While the title of the book can be translated as harmonizing the hundred teachings the content of the book reveals that the author considers Buddhism an important key in this harmonizing Initially Yi compares Buddhism with eleven teachings traditional foreign and indigenous showing that Buddhism has points of similarity with all of them After proceeding to produce an outline of basic Buddhist doctrine he concludes by arguing against the common criticisms of Buddhism at the time often using comparative examples from other religions Although the Baekgyo hoetong is written in the traditional styles of arraying quotes in the structure of a series of questions and answers it reflects well the complexity of Korea's newly modernizing society that was teeming with intellectual diversity for the first time in centuries Yi an avid scholar of Chinese classics Buddhist scriptures western science and Korean folk culture makes the book possible by his broad erudition Yi uses his newly acquired knowledge to harmonize the hundred teachings from a Buddhist point of view warning readers that dogmatic belief in one's own truth is in fact what is farthest from the truth
