## **Dutch Telecommunications Law:**

*Dutch Telecommunications Law* Peter Eijsvoegel, H. J. de Ru, 2000 The Dutch telecommunications market is probably one of the most open in the world Three years after its full liberalisation which was completed six months ahead of the EU timetable the Netherlands have approximately 65 operators with interconnection or special network agreements including five providers of mobile telephony networks Nearly all of the world's largest international players have established a presence in the Dutch telecom market It is for their benefit and for the benefit of their advisers that this book has been published Dutch Telecommunications Law contains the full text of the Dutch Telecommunications Act and of the most important decrees adopted thereunder concurrently in Dutch and in the English language In addition it contains a practical introduction to the telecommunications laws of the Netherlands described by leading practitioners in the field

Telecommunications Regulation in the Netherlands Peter V. Eijsvoegel, 1997-01-01 As in the rest of the world the telecommunications industry in the Netherlands has been subject to drastic change over the last few years By necessity the same applies to its regulation the present Dutch Telecommunications Act dates from 1988 when competitive provision of infrastructure and services was almost non-existent Since then technological developments and a general tendency towards liberalisation have had a profound impact on the market structure on 15 July 1996 a major amendment to the Dutch Telecommunications Act introduced virtually unlimited competition in the provision of fixed telecommunication infrastructure In addition almost all telecommunication services with the exception of public voice telephony were liberalised This book provides an introduction to Dutch telecommunications regulation and contains English translations of the Telecommunications Act the Fixed Telecommunications Infrastructure Licenses Act and a number of important regulations implementing the acts This publication results from a cooperative effort between the law firm Loeff Claeyns Verbeke and the Telecommunications and Post Department of the Ministry of Transport Public Works and Water Management

Competition Law of the European Union and the Netherlands Tom Ottervanger, S. J. van der Voorde, 2002-08-22 This second edition of Competition Law of the European Union and the Netherlands an overview is a complete revision and update of an earlier publication of 1998 published shortly after the introduction of the Dutch Competition Act Competition law is of vital importance for all major strategic business decisions and for all corporate and M&A transactions This book is a

comprehensive analysis of the EC and Dutch rules and practises in this area of the law It is only a matter of size of the parties and of the transaction whether the EU or Dutch rules apply This is the primary reason for discussing both sets of rules in one publication The other reason is that the EC rules and practices are a major source of inspiration for the Dutch legislator regulator and the courts
