Dutch Landscape Prints of the Seventeenth Century, 1966 David Freedberg, 1980 *Dutch Landscape Prints of the Seventeenth Century* Macdonald Stewart Art Centre, Judith Nasby, 2004 Journey through Landscape in Seventeenth-Century Holland: The Haarlem Print Series and Dutch Identity, The sets of landscape etchings produced in the second decade of the seventeenth century by Claes Jansz Visscher Esaias van den Velde Willem Buytewech and Jan van de Velde drew on and contributed to a print culture that played a key role in defining Dutch landscape Examination of these printed landscape series as part of a wide ranging print culture underscores the consistent interrelationship of landscape history and politics To varying degrees the contemporaneous descriptive geographies histories allegorical tableaux didactic prints and poetic anthologies considered in this study provide parallels for the prints serial structure journey theme and commemorative motifs Moreover as part of a wider enterprise of Dutch self definition they provide cultural guidelines for the interpretation of landscape in prints and paintings Levesque s study of the Dutch seventeenth century experience of place is two tiered She addresses the journey through landscape as an interpretive framework the spatial structure of knowledge the benefits of travel from the point of view of humanists and the growth of a Dutch national self consciousness expressed through landscape She also provides a close reading of the structure and motifs in the print series of Claes Jansz Visscher Esaias van den Velde Willem Buytewech and Jan van de Velde

Kuretsky, 1976-03-01 The Made Landscape Kristina Hartzler Nguyen, 1992 *The 'Small Landscape' Prints in Early Modern Netherlands* Alexandra Onuf, 2017-01-02 In 1559 and 1561 the Antwerp print publisher Hieronymus Cock issued an unprecedented series of landscape prints known today simply as the Small Landscapes The forty four prints included in the series offer views of the local countryside surrounding Antwerp in simple unembellished compositions At a time when vast panoramic and allegorical landscapes dominated the art market the Small Landscapes represent a striking innovation This book offers the first comprehensive analysis of the significance of the Small Landscapes in early modern print culture It charts a diachronic history of the series over the century it was in active circulation from 1559 to the middle of the seventeenth century Adopting the lifespan of the prints as the framework of the study Alexandra Onuf analyzes the

successive states of the plates and the changes to the series as a whole in order to reveal the shifting artistic and contextual valences of the images at their different moments and places of publication This unique case study allows for a new perspective on the trajectory of print publishing over the course of the late sixteenth and early seventeenth centuries across multiple publishing houses highlighting the seminal importance of print publishers in the creation and dissemination of visual imagery and cultural ideas Looking at other visual materials and contemporary sources including texts as diverse as humanist poetry and plays agricultural manuals polemical broadsheets and peasant songs Onuf situates the Small Landscapes within the larger cultural discourse on rural land and the meaning of the local in the turbulent early modern Netherlands The study focuses new attention on the active and reciprocal intersections between printed pictures and broader cultural economic and political phenomena

**The Ashgate Research Companion to Dutch Art of the Seventeenth Century** Wayne Franits, 2017-07-05

Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently

*Dutch Figure Drawings from the Seventeenth Century* Peter Schatborn, Rijksmuseum (Netherlands). Rijksprentenkabinet, National Gallery of Art (U.S.), 1981

Contrary to our conception of Italian and Spanish drawing figure studies are not the first works that come to mind when one imagines the panorama of Dutch drawing from Holland's flourishing period One might think first about the quiet landscapes of Van Goyen river views under a high sky with a ferry boat transporting travelers or about cattle with a shepherd in the shade of a willow as depicted by Cuyp or Potter Another will see Ruisdael's heavy trees Molijn's views of dunes or the woods of Waterloo For many the images are lively scenes at a public house by Ostade or colorful ice scenes by Averkamp and nobody will forget the butterflies and insects and the shells and flowers which were famous in such great numbers throughout the entire 17th century Studies of the human figure are

initially somewhat out of the picture And what about Rembrandt then Yes those who think about his drawn cruvre see directly next to his biblical compositions landscapes beggars and Orientals nude models posing at the border of light and dark rapid and precise figure sketches with the reed pen sometimes four or five together on one sheet In the extremely versatile cruvre of Rembrandt we find our first ideas about Dutch drawings corrected and now figure drawings by other artists also appear in the field of vision Through closer observation these drawings appear in always greater numbers in ever richer variation of type and in unexpected colorful nuances of drawing techniques and materials Among them one recognizes here and there one among a selection of One Hundred Drawings from the Golden Age or Seventeenth Century Drawings from Public Collections By now they seem to be accompanied by a whole crowd of family members several generations that are very different from one another all of them silent and waiting to be brought to speak
