Peveto, PhD, 2004-11-18 By comparing the findings from Kalish s and Reynolds s landmark 1970 s Death and Ethnicity Study to their own present study Hayslip and Peveto examine the impact of cultural change on death attitudes With a focus on African American Asian American and Hispanic American subpopulations with Caucasians treated as a comparison group the authors come to several conclusions including the shift toward more interest in being informed of one s own terminal prognosis a more personal approach to funerals and mourning observances a greater focus on family and relationships Unplugged William H. Colby, 2006 Medical technology has helped mankind conquer tuberculosis polio and countless other once certain death diseases It has given us hope against cancer and AIDS allowed heart and brain surgeries that have saved untold numbers of lives and delivered us from the pain and crippling legacy of injury Medical technology it seems is a never ending string of miracles But it is also a double edged sword More often than not death today happens because of a decision to stop doing something or to not do it at all As the tragic life and death of Terri Schiavo so poignantly illustrated universal definitions of life death nature and many other concepts are elusive at best Unplugged addresses the fundamental questions of the right to die debate and discusses how the medical advances that bring so much hope and healing have also helped to create today s dilemma This compelling book explores recent high profile cases including that of Mrs Schiavo and illuminates the complex legal ethical medical and deeply personal issues of a debate that ultimately affects us all Compassionate and beautifully written the book helps readers understand the implications of current laws and proposed legislation various medical options including hospice and the typical end of life decisions we all must face in order to make informed decisions for ourselves and our loved ones *Insomniacs, We* J.
