Death John B. Williamson, Edwin S. Shneidman, 1995 These classic and contemporary essays explore the broad range of structural and social contexts of death They cover issues including the psychology sociology and ethics of death and dying *Cancer, Stress, and Death* Stacey B. Day, 1986-04-30 This book has been well received in many places and in many countries It was awarded a ranking in the top ten publications on behavioral medicine in the year that it first appeared When in 1977 we began to fit the components of Cancer Stress and Death together the established medical view was that each subject repre sented a different discipline and that to integrate fields so diverse in information content was to seek to achieve a synthesis beyond reasonable limits Had we

been required to concern ourselves with the knowledge of each component in its entirety this might have been so but our concern of course was to integrate only those items of knowledge in any one field that could bear upon the field of interest of another Moreover we were concerned that physicians and scientists take account of the inner forces that shape motivation and individual behavior as well as the cultural identity of individuals and we hoped that the biopsychosocial way in which we believed would gain ground and win support Now with need for a second edition one can hardly conceive of not bringing together diverse contributions in one volume Such syntheses as we have made clearly confirm that one can arrive at several levels of understanding of human situations through wise integration of biological paradigms within various social cultural and psychological parameters which essentially is a simple way of defining the biopsychosocial way

Theology, Death and Dying Ray S. Anderson, 2012-04-14 How do we make sense of death in theology in philosophy in experience How do religions other than Christianity deal with death and with dying In the now predominantly secular societies of the West what are we to make of the theologies of death developed by writers such as Becker Hick Thielicke and Macquarrie Ray Anderson tackles his subject with clarity and without sentimentality He discusses first the treatment and indeed the denial of death by contemporary Western society and its place in other religious traditions Going on to discuss the origins of a Christian theology of death he examines the legacy of Judaism and seeks to lay the foundations for a Christian anthropology in the unity of the body and soul Death he argues is alien to God's determination of our personhood Outlining a classic Christian understanding of the death and resurrection of Jesus Christ he explores the implications of the Passion for our own mortality Even if the sting of death has been removed the experience of dying and bereavement remains Ray Anderson considers pastoral approaches to dying in the light of his observations and arguments and makes his case for a reintegration of the experience of dying into our communities

The Social Meaning of Death Renée Claire Fox, 1980 Book department pages 101 142 Includes index

Precious Enemy Toby Jennings, 2017-04-17 King Solomon asserted love is as strong as death Song of Solomon 8 6 Solomon the wisest of all Israel's kings recognized that while every human would eventually succumb to death death is not ultimate in power The God whose essence is love designed and created both human life and death as instruments for the display of his own splendor and purposes Neither human life nor death then can deviate from God's ultimate purpose and good for the creature made in his own image Biblically death serves as the perfect foil to mark both the immeasurable value of human life and at the same time the relatively limited value of it Rather than either worshipping or desecrating this finite gift of human life we can value it rightly and also worship the God who in his literally infinite wisdom gives and takes away life in accord with his good and gracious purposes

The Annals of the American Academy of Political and Social Science, 1980

Beyond the Innocence of Childhood David Adams, Eleanor Deveau, 2020-11-25 Death is not a mere possibility but a certainty for all of us Yet today's society unrealistically portrays childhood as a time of unremittant joy and freedom Unfortunately the reality of life may suddenly bring children face to face with tragic

circumstances such as the death of their pet the terminal illness of their parent their own struggle with life threatening disease the accidental death of their sibling or the suicide of a friend The gravity of any of these situations takes children beyond the innocence of childhood and plunges them into a world that is frightening and full of uncertainty Unfortunately our perceptions and attitudes toward death do not equip children with the tools to help them cope adequately with such overwhelming experiences Beyond the Innocence of Childhood is a collection of forty chapters which are divided into three separate volumes The overall purpose of this series is to answer the question How do we as educators clinicians other professionals and parents help children and adolescents deal with threat to their lives dying death and bereavement In this three volume set the editors have brought together a number of well known educators researchers and practitioners who share their knowledge and expertise concerning the care and well being of children and adolescents

SPECIFIC TO VOLUME 1

Children explore the world around them through spontaneous and later structured learning acquire knowledge learn to understand themselves establish their role in the family develop peer and adult relationships and find their place in the world However today s society does not include death as part of this developmental process Unfortunately such avoidance may negatively influence children s ability to acquire an understanding of the concepts of death and to develop positive attitudes toward death Highlights of this section include Answering children s questions Children and death past present and future Gender differences Teachable moments Perceptions of death cognitive development and children s artwork The second part of volume 1 examines influences in today s society that potentially impact on children and adolescents perceptions and attitudes toward life threatening illness and death This volume offers readers valuable insights into the various factors which ultimately affect children s ability to achieve a mature understanding of death Features include the following Violent death in a popular culture and the media Political conflict and war The epidemic of AIDS Cultural differences in the management of life threatening illness Death rituals and funeral ceremonies
