Biotectonics Malte C. Ebach, Bernard Michaux, 2020-10-01 Tectonic plates are constantly moving either crashing into one another creating a mosaic of mountains and shallow seas or tearing apart and isolating large swathes of land In both cases plate tectonics separates populations leading to the evolution of biota Tectonics is also responsible for the destruction life for instance when large coral reefs or shallow seas are compressed to form mountain peaks Could recent research into these processes provide enough evidence to show that tectonics may be the ultimate driver of life on Earth Our book delves into the current research in tectonics particularly neotectonics and its impact on rapid changes on biogeographical classification also known as bioregionalisation We also introduce a new term biotectonics that studies the impact of tectonics on biogeoregionalisation The question we ask is how tectonics directly influences the distribution of biota in four case studies the Mesozoic and early Palaeogene Australides which spans the Proto Pacific coast of the South America Antarctica and Australiasia and the Neogene of Australia To conclude we examine the role of neotectonics on transition zones and the Amazon Basin and make a case for biotectonic extinction

Bridge Traffic Loading Eugene O'Brien, Andrzej Nowak, Colin Caprani, 2021-12-02 There is considerable uncertainty about what level of traffic loading bridges should be designed for Codes specify notional load models generally to represent extreme levels of normal traffic but these are often crude and have inconsistent levels of safety for different load effects Over the past few decades increasing quantities of reliable truck weight data has become available and it is now possible to calculate appropriate levels of bridge traffic loading both for specific bridges and for a road network Bridge Traffic Loading brings together experts from all over the world to deliver not just the state of the art of vertical loading but also to provide recommendations of best practice for all the major challenges in the field short span single and multi lane bridge loading dynamic allowance and long span bridges It reviews issues that continue to be debated such as which statistical distribution is most appropriate whether free flowing or congested traffic governs and dealing with future traffic growth Specialist consultants and bridge owners should find this invaluable as will regulators

Reshaping Australia's Economy

Australia's Competitiveness

Michael J. Enright, Richard Petty, 2013-05-08 In this in depth overview of Australia's economy Michael Enright and Richard Petty leading scholars on

international competition look at the data behind the news reports to offer a complete view of Australia's stable and wealthy economy. The book compares Australia with other similarly sized OECD economies as well as other Asia Pacific economies and looks at fifteen international sources of data on competitiveness. It features a large scale survey on Australian companies and offers deep insight on the country's future in terms of economics and economic policy. Revealing an honest assessment of Australia's true position in the world, the book looks at how Australian businesses see themselves and offers policy positions for government and firms to make the most of Australia's unique global economic position. Backed by CPA Australia, one of the world's largest accounting bodies. Written by two global authorities on economic competitiveness. Captures the thinking of more than 6,000 business leaders both within and outside of Australia. Explains how Australia has weathered the global recession and looks at Australia's relationship with China. For business leaders and policy makers in need of an in-depth look at the current and future state of Australia's economy, this book offers valuable and comprehensive information.

Emotion Recognition Amit Konar, Aruna Chakraborty, 2014-12-10. A timely book containing foundations and current research directions on emotion recognition by facial expression, voice, gesture, and biopotential signals. This book provides a comprehensive examination of the research methodology of different modalities of emotion recognition. Key topics of discussion include facial expression, voice, and biopotential signal based emotion recognition. Special emphasis is given to feature selection, feature reduction, classifier design, and multi-modal fusion to improve performance of emotion classifiers. Written by several experts, the book includes several tools and techniques including dynamic Bayesian networks, neural networks, hidden Markov model, rough sets, type 2 fuzzy sets, support vector machines, and their applications in emotion recognition by different modalities. The book ends with a discussion on emotion recognition in automotive fields to determine stress and anger of the drivers responsible for degradation of their performance and driving ability. There is an increasing demand of emotion recognition in diverse fields including psychotherapy, bio-medicine, and security in government public and private agencies. The importance of emotion recognition has been given priority by industries including Hewlett Packard in the design and development of the next generation human computer interface (HCI) systems. *Emotion Recognition: A Pattern Analysis Approach* would be of great interest to researchers, graduate students, and practitioners as the book offers both foundations and advances on emotion recognition in a single volume. Provides a thorough and insightful introduction to the subject by utilizing computational tools of diverse domains. Inspires young researchers to prepare themselves for their own research. Demonstrates direction of future research through new technologies such as Microsoft Kinect, EEG systems, etc.
