## **Dynamic Fuzzy Pattern Recognition With Applications To Finance And Engineering:**

*Dynamic Fuzzy Pattern Recognition with Applications to Finance and Engineering* Larisa Angstenberger, 2013-03-14

Dynamic Fuzzy Pattern Recognition with Applications to Finance and Engineering focuses on fuzzy clustering methods which have proven to be very powerful in pattern recognition and considers the entire process of dynamic pattern recognition. This book sets a general framework for Dynamic Pattern Recognition describing in detail the monitoring process using fuzzy tools and the adaptation process in which the classifiers have to be adapted using the observations of the dynamic process. It then focuses on the problem of a changing cluster structure: new clusters, merging of clusters, splitting of clusters, and the detection of gradual changes in the cluster structure. Finally, the book integrates these parts into a complete algorithm for dynamic fuzzy classifier design and classification.

**Dynamic Fuzzy Pattern Recognition with Applications to Finance and Engineering**, 2010 *Advances in Fuzzy Clustering and Its Applications* Jose Valente de Oliveira, Witold

Pedrycz, 2007-06-05 A comprehensive, coherent, and in-depth presentation of the state of the art in fuzzy clustering. Fuzzy clustering is now a mature and vibrant area of research with highly innovative advanced applications. Encapsulating this through presenting a careful selection of research contributions, this book addresses timely and relevant concepts and methods whilst identifying major challenges and recent developments in the area. Split into five clear sections: Fundamentals, Visualization, Algorithms and Computational Aspects, Real Time and Dynamic Clustering and Applications, and Case Studies, the book covers a wealth of novel, original, and fully updated material and in particular offers a focus on the algorithmic and computational augmentations of fuzzy clustering and its effectiveness in handling high-dimensional problems, distributed problem solving, and uncertainty management. Presentations of the important and relevant phases of cluster design, including the role of information granules, fuzzy sets in the realization of human-centricity, facet of data analysis, as well as system modelling, demonstrations of how the results facilitate further detailed development of models, and enhance interpretation aspects, a carefully organized illustrative series of applications and case studies in which fuzzy clustering plays a pivotal role. This book will be of key interest to engineers associated with fuzzy control, bioinformatics, data mining, image processing, and pattern recognition, while computer engineers, students, and researchers in most engineering disciplines will find this an invaluable resource and research tool.

**Meta-Heuristics Optimization Algorithms in Engineering, Business, Economics, and Finance** Vasant, Pandian M., 2012-09-30 Optimization techniques have developed into a significant area concerning industrial, economics, business, and financial systems. With the development of engineering and financial systems, modern optimization has played an important role in service-centered operations and as such has attracted more attention to this field. Meta-heuristic hybrid optimization is a newly developed mathematical framework-based optimization technique. Designed by logicians, engineers, analysts, and many more, this technique aims to study the complexity of algorithms and problems. *Meta-Heuristics Optimization Algorithms in Engineering, Business, Economics, and Finance* explores the emerging

study of meta heuristics optimization algorithms and methods and their role in innovated real world practical applications  
This book is a collection of research on the areas of meta heuristics optimization algorithms in engineering business economics and finance and aims to be a comprehensive reference for decision makers managers engineers researchers scientists financiers and economists as well as industrialists
