Back Sense:

Back Sense Dr. Ronald D. Siegel, Michael Urdang, Dr. Douglas R. Johnson, 2002-04-09 On occasion nearly everyone experiences short term back pain from sore or strained muscles But for many who come to treat their back gingerly because they fear further injury a cycle of worry and inactivity results this aggravates existing muscle tightness and leads them to think of themselves as having a bad back Even worse is the understandable but usually counterproductive assumption that back pain is caused by abnormalities bulging disks a damaged spine and so on However these abnormalities are frequently found in those who have absolutely no pain whatsoever In reality most backs are strong and resilient built to support our bodies for a lifetime truly bad backs are rare Drawing on their work with patients and studies from major scientific journals and corporations the authors of Back Sense all three are former chronic back pain sufferers themselves developed a revolutionary self treatment approach targeting the true causes of chronic back pain It is based on conclusive evidence proving that stress and inactivity are usually the prime offenders and it allows patients to avoid the restrictions and expense of most other treatments After showing readers how to rule out the possibility that a rare medical condition is the source of their problem Back Sense clearly and convincingly explains the actual factors behind chronic back pain and systematically leads readers toward recapturing a life free of back pain
