Mehra,2023-03-29 The Quaternary Period in South Asia has a very prolonged and diverse history Within this region India represents various technological and cultural phases of hominin occupation adapting to different ecological zones throughout the Quaternary Period The earliest records of this occupation can be traced back to 1.5 Ma ago and possibly to c. 2 Ma ago Archaeological evidence has been reported from all known phases in India showing a continuous record of occupation from the Early Pleistocene onwards and reflecting adaptation by multiple hominin species over time This book aims to highlight recent advances in the Quaternary geoarchaeology by showcasing diverse methods such as archaeology geology palaeoclimatology sedimentology GIS remote sensing and taphonomy It presents a collection of papers that address various geoarchaeological aspects from different regions in India within the time frame of the Early Pleistocene to Anthropocene This volume provides an opportunity for new data to be disseminated particularly by young researchers and within the framework of worldwide research issues it promotes new geoarchaeological perspectives from India History from the Earth James L. Forde-Johnston,1974 **Five Hundred Years Rediscovered** Natalie Swanepoel,Amanda Esterhuysen,Phil Bonner,2008-08-01 In the age of the African Renaissance southern Africa has needed to reinterpret the past in fresh and more appropriate ways The last 500 years represent a strikingly unexplored and misrepresented period which remains disfigured by colonial apartheid assumptions most notably in the way that African societies are depicted as fixed passive isolated unenterprising and unenlightened This period is one the most formative in relation to southern Africa's past while remaining in many ways the least known Key cultural contours of the sub continent took shape while in a jagged and uneven fashion some of the features of modern identities emerged Enormous internal economic innovation and political experimentation was taking place at the same time as expanding European mercantile forces started to press upon southern African shores and its hinterlands This suggests that interaction flux and mixing were a strong feature of the period rather than the homogeneity and fixity proposed in standard historical and archaeological writings Five Hundred Years Rediscovered represents the first step taken by a group of archaeologists and historians to

collectively reframe revitalise and re examine the last 500 years By integrating research and developing trans frontier research networks the group hopes to challenge thinking about the region s expanding internal and colonial frontiers and to broaden current perceptions about southern Africa s colonial past Archaeology of the United States, Or, Sketches, Historical and Bibliographical, of the Progress of Information and Opinion Respecting Vestiges of Antiquity in the United States Samuel F.
