

Bacon and Descartes

Intro to two influential thinkers (Bacon & Descartes)

particularly their work on the methods of science ('natural philosophy') which played an important role in what came to be known as the "Scientific Revolution".

- Touch on some wider themes connected to their work.
- Returning to Kant's idea of the enlightenment, and the need for freedom of the press to spread it.
- A key change in how nature was conceived (one that, arguably, this still haunts us today).

Bacon is mostly regarded as a philosopher today, although he worked more in practical, hands on science

Descartes, mostly regarded as philosopher as well although he was very influential in science and medicine

To find out more about their lives and works, [Stanford Encyclopaedia of Philosophy](#)

- An authoritative source
- Why so?
- Written by experts who dedicate their life's work to studying these authors and works.
- Critically reviewed by other experts.
- Updated in light of new publications and evidence.
- Reports on some of the scientific disagreement about the sources and owns up to their particular perspectives.

The two had some common starting points:

- Critique of the dominant image of the world (scholastic Aristotelianism)

Background: before the Enlightenment period...

- Aristotle (384–322 B.C.E.) as one of the two most famous Ancient Philosophers.
- Extensive works on nature, which – via the Islamic world – returned to Europe during the Middle Ages.
 - Explain objects behaviour by its internal nature, not anything external.
 - Why does X fall to the earth? In its nature - real quality 'gravitas'
 - (1) Observe the behaviour of objects, describe, classify.
