Builder ,2004 *Building Systems* ,2000-07 Building Systems Magazine BSM is an award winning United States based trade magazine read by builders developers and general contractors using or considering using innovative construction technologies Once commonly known as pre fab today s modern building systems employ innovative materials and techniques to create residential or commercial structures in a factory setting in a fraction of the time it takes to site build BSM focuses mainly on log timber frame modular panel and structural insulated panel building technologies Since factory fabrication and site preparation take place simultaneously structures are finished and ready for occupancy in weeks rather than months or years as required by conventional site building schedules **How Solar Energy Became Cheap** Gregory F.

Nemet,2019-05-20 Solar energy is a substantial global industry one that has generated trade disputes among superpowers threatened the solvency of large energy companies and prompted serious reconsideration of electric utility regulation rooted in the 1930s One of the biggest payoffs from solar s success is not the clean inexpensive electricity it can produce but the lessons it provides for innovation in other technologies needed to address climate change Despite the large literature on solar including analyses of increasingly detailed datasets the question as to how solar became inexpensive and why it took so long still remains unanswered Drawing on developments in the US Japan Germany Australia and China this book provides a truly comprehensive and international explanation for how solar has become inexpensive Understanding the reasons for solar s success enables us to take full advantage of solar s potential It can also teach us how to support other low carbon technologies with analogous properties including small modular nuclear reactors and direct air capture However the urgency of addressing climate change means that a key challenge in applying the solar model is in finding ways to speed up innovation Offering suggestions and policy recommendations for accelerated innovation is another key contribution of this book This book will be of great interest to students and scholars of energy technology and innovation climate change and energy analysis and policy as well as practitioners and policymakers working in the existing and emerging energy industries
