**for Digital Talent Acquisition and Management** Ilango Velchamy, Leena N. Fukey, Uma V. R., Kaliyaperumal Srinivasan, 2026-01-12 Artificial Intelligence for Digital Talent Acquisition and Management Analytical Approaches Practices Models for Digitalization analyses the intersection of AI and workforce strategies offering readers a thorough exploration of analytical approaches cutting edge practices and innovative models **Digital Information for Patient Education, Volume II** Xiaofei Zhang, Feng Guo, Paul H. Lee, 2026-02-16 This Research Topic is the second volume Please see the first volume at Digital Information for Patient Education Due to recent technological advancements technologies such as online platforms big data live streaming and artificial intelligence are leading the transformation of health medical information by aiding in the development of innovative healthcare information management models Digital health information helps patients access health knowledge remotely positively impacting their well being There is a large gap between the provision of digital health information and patient outcomes particularly in how digital information is provided for better patient education

Understanding healthcare information is crucial for the digital transformation of health services. Patients need to fully comprehend the online healthcare information to manage their health effectively. However, certain medical knowledge such as medical terminology is generally difficult for patients to understand. We believe that digital technologies may bridge this gap as they provide various types and formats of information along with different methods of presentation to enrich the health information sharing process. Specifically, digital technologies enable patients to better understand health medical knowledge and take appropriate actions to manage their health. This Research Topic is interested in original contributions that conceptualize and contextualize the organization of digital health information to benefit patient understanding of online health medical knowledge. We welcome submissions that provide empirical evidence on leveraging digital technologies in healthcare including mobile ICTs, big data, artificial intelligence, live streaming, and the design and deployment of new tools and techniques, as well as data analytics in healthcare for better patient understanding. We also encourage submissions that investigate theoretical frameworks and practical tools related to digital healthcare information, including the organization, display, and provision of health information. This research topic particularly encourages original research articles that address a range of topics including but not limited to: Med tech, data-enabled technologies in information management for patient education, The role of mobile health, Information and Communication Technologies (ICTs) in information sharing for patient education, Provision of health information based on big data, Application of artificial intelligence in patient education, Effectiveness of digital technologies in patient education, Innovative digital technologies to improve patient understanding of health information, Ethical and legal issues involving digital health information in patient education.
