English and Member of the Doctoral Faculty in Neuroscience and Cognitive Science University of Maryland, 2001-08-16 What  
will be the future of social science Where exactly do we stand and where do we go from here What kinds of problems should  
we be addressing with what kinds of approaches and arguments In *Cognitive Dimensions of Social Science* Mark Turner  
offers an answer to these pressing questions social science is headed toward convergence with cognitive science Together  
they will give us a new and better approach to the study of what human beings are what human beings do what kind of mind  
they have and how that mind developed over the history of the species Turner one of the originators of the cognitive  
scientific theory of conceptual integration here explores how the application of that theory enriches the social scientific study  
of meaning culture identity reason choice judgment decision innovation and invention About fifty thousand years ago humans  
made a spectacular advance they became cognitively modern This development made possible the invention of the vast range  
of knowledge practices and institutions that social scientists try to explain For Turner the anchor of all social science  
anthropology political science sociology economics must be the study of the cognitively modern human mind In this book  
Turner moves the study of those extraordinary mental powers to the center of social scientific research and analysis      *The
