## **Babylonian Liver Omens:**

**Babylonian Liver Omens** Ulla Susanne Koch, 2000 The canonical version of the Babylonian omen series concerned with barutu extispicy divination from entrails of sheep consisted of ten chapters or sub series and are among the first intellectual adventures of Ancient Man into the field of science Three of these chapters all concerned with the front of the liver are edited here for the first time Also the book contains a complete analysis of the Akkadian terms used in divination a complete index of texts and words copies of the new found texts and photographic plates assisting the reader **Babylonian-Assyrian Birth -Omens and Their Cultural Significance** Morris Jastrow, 1914 *Babylonian-Assyrian Birth-omens and Their Cultural Significance* Morris Jastrow (Jr.), 1914 Writing, Law, and Kingship in Old Babylonian Mesopotamia Dominique Charpin, 2010-11-15 Ancient Mesopotamia the fertile crescent between the Tigris and Euphrates rivers in what is now western Iraq and eastern Syria is considered to be the cradle of civilization home of the Babylonian and Assyrian empires as well as the great Code of Hammurabi The Code was only part of a rich juridical culture from 2200 1600 BCE that saw the invention of writing and the development of its relationship to law among other remarkable firsts Though ancient history offers inexhaustible riches Dominique Charpin focuses here on the legal systems of Old Babylonian Mesopotamia and offers considerable insight into how writing and the law evolved together to forge the principles of authority precedent and documentation that dominate us to this day As legal codes throughout the region evolved through advances in cuneiform writing kings and governments were able to stabilize their control over distant realms and impose a common language which gave rise to complex social systems overseen by magistrates judges and scribes that eventually became the vast empires of history books Sure to attract any reader with an interest in the ancient Near East as well as rhetoric history and classical studies this book is an innovative account of the intertwined histories of law and language Mediating Between Heaven and Earth C.L. Crouch, Jonathan Stökl, Anna Elise Zerneck, 2012-12-06 Analyzes the variety of religious practices employed to communicate with deities and to interpret the divine response including intuitive divination prophecy technical divination and prayers *Imagining the Jewish God* Leonard Kaplan, Ken Koltun-Fromm, 2016-09-09 Jewish art has always been with us but so has a broader canvas of Jewish imaginings in thought in emotion in text and in ritual practice Imagining the Jewish God was there in the beginning as it were engraved and embedded in the ways Jews lived and responded to their God This book attempts to give voice to these diverse imaginings of the Jewish God and offers these collected essays and poems as a living text meant to provoke a substantive and nourishing dialogue A responsive living covenant lies at the heart of this book a covenantal reciprocity that actively engages the dynamics of Jewish thinking and acting in dialogue with God The contributors to this volume are committed to this form of textual reasoning even as they all move us beyond the text as foundational for the imagined people of the book That people we submit lives and breathes in and beyond the texts of poetry narrative sacred literature film and graphic mediums We imagine the Jewish people and the covenant they respond to as

provocative intimations of the divine The essays in this volume seek to draw these vocal intimations out so that we can all hear their resonant call

**Predicting the Past in the Ancient Near East** Matthew Neujahr, 2012-11-06 This work provides an in depth investigation of after the fact predictions in ancient Near Eastern texts from roughly 1200 B C E 70 C E It argues that the Akkadian Aramaic Hebrew and Greek works discussed are all part of a developing scribal discourse of mantic historiography by which scribes blend their local traditions of history writing and predictive texts to produce a new mode of historiographic expression This in turn calls into question the use and usefulness of traditional literary categories such as apocalypse to analyze such works

*Divination as Science* Jeanette C. Fincke, 2016-06-21 There is no doubt that Ancient Near Eastern divination is firmly rooted in religion since all ominous signs were thought to have been sent by gods and the invocation of omens was embedded in rituals Nonetheless the omen compendia display many aspects of a generally scientific nature In their attempt to note all possible changes to the affected objects and to arrange their observations systematically for reference purposes the scholars produced texts that resulted in a rather detailed description of the world be it with respect to geography the urban or rural environment on earth or celestial and meteorological phenomena observed in the sky biology the outer appearance of the bodies of humans or animals or the entrails of sheep sociology behavior of people or others Based on different divination methods and omen compendia the question discussed during this workshop was whether the scholars had a scientific approach presented as religion or whether Ancient Near Eastern divination should be considered purely religious and that the term science is inappropriate in this context The workshop attracted a large audience and lively discussion ensued The papers presented in this volume reflect the focus of the sessions during the workshop and are likely to generate even more discussion now that they are published
