## **Bac Oneeleven:**

*BAC One-Eleven* Stephen Skinner,2013-07-01 In August 1963 one of the best selling aircraft of British civil aviation the BAC One Eleven took to the skies for the first time With an order book for sixty aircraft more than half were from the United States which was an unprecedented situation for a British civil aircraft The first project for the newly formed British Aircraft Corporation the One Eleven was wholly designed and built by BAC and remained in production throughout the entire seventeen year history of the organisation performing strongly even when profits were at a low After flying commercially in Europe for the last time in March 2002 here the One Eleven is celebrated in style **British Aircraft Corporation** Stephen Skinner,2012-08-01 The British Aircraft Corporation was formed from The Bristol Aeroplane Company English Electric Vickers Armstrong and Hunting in 1960 In its short seventeen year life the British Aircraft Corporation built some of the most important aircraft and missiles of the 1960s 1970s and beyond its best known products included the Jaguar and Tornado warplanes Rapier missile and One Eleven airliner It was also responsible for the stillborn TSR2 strike aircraft the 1965 cancellation of which remains controversial to this day Most famously the Anglo French Concorde supersonic airliner came from the BAC stable BAC was subsumed into British Aerospace now BAE Systems in 1977 but many of its products remain in service to this day This book tells their complete story *A History of Aviation at Brooklands in 100 Objects* Nigel Spooner,2024-07-30 At the dawn of the twentieth century mankind had not yet achieved powered flight The main motive power then was provided by steam engines heavy dirty and inefficient If one wanted to travel over seas one had to travel on them A journey from London to New York by steam driven train and ship took more than 6 days By the time the same century drew to a close in December 1999 air travel was the normal choice for long journeys Millions of people every day flew comfortably and safely in pressurised aluminium airliners propelled by simple clean and efficient gas turbine engines The same journey from London to New York could be achieved at supersonic speed in less than 6 hours For much of that century many of the extraordinary developments that moved aviation from fragile wood and fabric biplanes to supersonic transports were achieved on 330 acres of low lying former estate farmland in Surrey England The estate was called Brooklands Those marshy acres were transformed from 1907 into the world s first custom built motor racing circuit then a rapidly developing aerodrome and finally one of the country s largest aircraft factories employing tens of thousands of people Nearly 19 000 aircraft of many different types were built at Brooklands during nine decades of peace and war By the 1980s however it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links its owner by then called British Aerospace finally closed the factory in 1989 This book tells the history of those amazing developments through 100 of the key aircraft engines places and other objects that can still be seen either in or near Brooklands Museum or in other locations around the country It also highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus

Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them
