*Kid Power, Inequalities and Intergenerational Relations* Clara Rübner Jørgensen, Michael Wyness, 2021-07-06 Contemporary understandings of inter generational relations assume that the balance of power has

shifted from adults towards children in recent years The rise of children s rights the trend towards more child centred pedagogies and practices within schools and the incorporation of children within a global free market as consumers have all been interpreted as the loss of adult power and the consequent growth of kid power This book critically examines these ideas and reframes the zero sum conceptions of power implicit within such assumptions It draws on Lukes three dimensions of power and Foucault s theory of power and knowledge in advancing the view that kid power is inter generational multi dimensional and distributed variably across the child population The book illustrates this theory through children s political activism their digital power and the varied roles they play within their families and communities The book also offers a brief re examination of kid power within the current context of Covid 19
