Island Tourism Sustainability and Resiliency Michelle McLeod,Rachel Dodds,Richard Butler,2022-04-27 This book provides comprehensive insight into the challenges faced by island tourism destinations and theoretical and practical paths for built in sustainability and resiliency It explores Island Tourism Resilience within the context of Lifecycles System Decline

and Resilience Tourism is a key activity for many islands and some depend on the tourism sector as a main economic activity. An exploration of islands across the globe that addresses substantial matters of ongoing sustainability and resiliency is ever important. An array of challenges including natural disasters, climate change, economic and political crises among others has been addressed in the book with additional areas such as overtourism and COVID 19 included at the conclusion. This volume is essential reading for academics, tourism planners and policy makers seeking to develop sustainable and resilient island destinations. With a new Foreword, Introduction, Conclusion and Afterword, the chapters in this book were originally published in the journal *Tourism Geographies*.

Performing Media Activism in the Digital Age Neil Alperstein, 2021-07-31. *Performing Media Activism in the Digital Age* breaks new ground by conceptualizing activism as a performance extending beyond public space and the moment of public gatherings to consider the more extended view of social or political movements as mediated social connections. The book utilizes primary data extracted from social media platforms by applying a social network analysis (SNA) approach to the people, organizations and media that are trying to advance their particular agendas with an eye toward a better understanding of the ways in which social movements operate in a networked society. The goal of social network analysis is to identify social structures within a movement such as communities or clusters and it seeks to locate influence within those structures. Social network analysis as applied to media activism represents an interdisciplinary field that encompasses social psychology, sociology as well as graph theory which should suggest this book will be of interest to scholars and students in these and related fields. In the digital age, social network analysis represents a paradigm shift as analytical and data visualization tools can be applied in an interdisciplinary manner. By combining data science and sociology or cultural anthropology, one has the means to visualize networks of individuals and organizations engaged in a social movement to see how movements are organized, structured into communities, clusters and niches and to visualize power structures within social movements to see who is influencing a network over extended periods of time.

Green Web-II Medani P. Bhandari, 2022-09-01. This second edition of the book *Green Web II: Standards and Perspectives from the IUCN Program* Policy Development in Environment Conservation Domain with reference to India, Pakistan, Nepal and Bangladesh investigates the IUCN's role in global biodiversity conservation policy as well as in national program development in India, Pakistan, Nepal and Bangladesh. It explores how nature protection priorities and approaches are promoted or addressed by IUCN and how environment conservation policies are created and maintained in states of South Asia with different capacities. It also evaluates IUCN's competency in biodiversity, climate change, nature conservation and environmental policy formulation at the global, regional and country levels. This book adds to our knowledge firstly by contributing to a small but growing body of work on the sociology of international organizations. International Governmental Organizations (IGOs) have previously been mainly the subject of political science. Secondly, it critically explores one of the largest and most active nature conservation organizations in the world. Thirdly, it also explores how IUCN actually goes about building protectoral programs.

with individual member nations Finally the research also shows the historical development of global institutions and IUCN s activities with member nations in helping to define or redefine the concept of global governance The outcomes of this research will also be beneficial for global collaboration networking and for the identification of common concerns among the many environmental and conservational organizations at the international and national level In this broader sense the research outcomes might be beneficial to constituencies of the global North as well as global South because of the nature and coverage of IUCN and its role in conservation policy formation This effort may serve as a model for additional research on international organizations Technical topics discussed in the book include The Motivation for Environmental Conservation How personal efforts make a difference The Role of International Environment Conservation Organizations The Political Economy of Organizations Network theory Institutional theory Stakeholder theory Governance theory Governance performance and Competitiveness Popularity indices Knowledge creation and diffusion Conservation commons
