

Abstract Concepts

A mental understanding that has no direct and specific physical form.

Overview

- **Languages** provide a rich set of abstract concepts that are handed down from generation to generation. Most words are abstract.
- Abstract concepts can be **social constructs** such as the idea of a "job." However, it could be argued that many supposed social constructs are not truly invented by society but are a reflection of **universal realities**. For example, "freedom" may not be invented but rather a fundamental aspect of life.
- Abstract concepts can be somewhat **subjective** but people can also construct strong shared and **universal meanings** that are abstract. For example, a constitution is abstract but a society may attach strong and specific meaning to this that is not open to the whims of subjective interpretation.
