our learning environments and to educate the facilitators and learners alike so that the learning process is both deepened and accelerated Learners will thereby be able to retain more by applying Accelerated Learning into their lives And the facilitating is less about delivering content and more about encouraging discovery reflection and learning This book combines the old the new and the likely helpful future ideas on Accelerated Learning as they have become available So you wouldn't be wrong if you say this book has all you need to know all the ready to go information on accelerated learning that should allow you if followed to learn at a much faster rate This book goes into Its history where it was gotten from who it was gotten from out of the idea it was gotten Provides insight into everything you need to know about Accelerated Learning its benefits its designs how to maximize your potential your memory capacity from a 128 megabyte to possibly a gigabyte and also the way you can facilitate in your lives be it in schools workplaces or you d lifestyle in general For those who facilitate learning this is a road map for them into the new world where you can grasp things as quickly as possible without wasting the time you would normally have 10 basic elements of Accelerated Learning This book teaches on the types of Acceleration strategies that could be designed to allow progress through the core contents of a school program at a rate more closely aligned with a student s ability and interests rather than being restricted by artificially imposed steps of progression It will be of great help to you if you learn about it its many benefits how to maximize your potential how to improve your memory and the methods conditions and the speed techniques to acquire instant speed learning This book provides you with all of it
