Accounting Intro To P P:

Liberalising the Accounting Curriculum in University Education Alan Sangster, Richard M.S. Wilson, 2014-10-29 This book presents the views of accounting educators accounting education policy makers and accounting practitioners from across the world on the challenging topic of liberalising the accounting curriculum within university education Accounting is a relatively new subject within universities and has been absorbed into a high level of education without any real attempt to do so within the traditional ethos of a liberal arts education In this book the logic of teaching using the liberal arts is described and contrasted with the practical vocational training approach of teaching which has formed the foundation of accountancy courses for many years A proposal to change this established practice by integrating the liberal arts into the university accounting curriculum is followed by a series of short chapters which address the relevance validity and worthiness of the proposed approach Comments and counter arguments are then discussed before further chapters illustrate how the proposed change may be achieved in a variety of different contexts ranging from that of the global financial crisis which began in 2008 to the inclusion of ethics and sustainability within the accounting curriculum This book will aid those teaching accounting in universities to improve the design of their accounting degree programmes by moving away from an excessive emphasis on technical skills towards a broader consideration of a liberal contextualisation of the accounting curriculum This book was originally published as a special issue of Accounting Education an international journal *An Introduction to Elementary Accounting* Ananias Charles Littleton, 1919 **Accounting Education Research** Richard M.S. Wilson, 2015-04-10 An annual prize is awarded for the best paper appearing in Accounting Education an international journal and this book contains the prize winning papers for every year from 1992 to 2012 The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice and all the papers in this book relate to that mission These papers reporting on research studies undertaken by accounting education scholars from around the world build on research findings from the broader domain of education scholarship and embrace a wide array of topics including curriculum development pedagogic innovation improving the quality of learning and assessing learning outcomes Of particular interest are three themes each of which runs through several of the papers students approaches to learning and learning style preferences ethics and moral intensity and innovation within the accounting curriculum Accounting educators will find many ideas in the book to help them in enriching their work and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report whether comparatively or longitudinally This book is a compilation of papers originally published in Accounting Education an international journal Subject Index of Modern Books Acquired British Library, 1927 **Business Accounting: Theory of accounts, by H.D.
