 Fess,James Reeve,1995 **The Timing of Income Recognition in Tax Law and the Time Value of Money** Moshe  
 Shekel,2009-05-28 Time itself creates advantages and disadvantages in the field of taxation The timing of the recognition of  
 income and expenses for tax purposes has two main implications firstly for the timing of the collection of tax and secondly for  
 the question of quantification i e how to ensure that the difference between the timing of the recognition of income or  
 expenses as opposed to the respective dates on which the amounts are actually received or paid does not distort the  
 determination of the amount of chargeable income The time component is a weapon in the confrontation between the  
 opposing motivations of the taxpayers and the tax authorities In any given fiscal year taxpayers seek to present a minimal  
 picture of their chargeable income by deferring the recognition of income or advancing the recognition of expenses As  
 opposed to this the tax authorities adopt the opposite strategy maximizing taxable profit in any given year This book critically  
 examines the various approaches that have been adopted in the tax systems in the UK the US and Israel in relation to the  
 timing of income recognition and expenses for tax purposes It suggests an innovative tax model that identifies the  
 advantages that arise to the taxpayer as a result of the differences between the timing of the recognition of income and  
 expenses and the timing of the receipt of the revenue or the payment of a liability and taxes only that advantage
